

Turnkey tech solutions for retail brokers

Product List

At the heart of our journey are our core values – integrity, quality, and commitment. These values have not only guided us but also inspired our remarkable team to create cutting-edge technology solutions that empower brokerage businesses worldwide. As a result, we’ve achieved sustainable growth and have forged enduring partnerships with clients, stakeholders, and industry peers.

Hello!

We are Brokeree Solutions – developers of technological solutions for multi-asset brokerages from all over the world.

Our global mission is to help our clients to extend their trading platforms in different areas such as liquidity aggregation, risk management, and money management. For more than 12 years we have been providing brokers from different jurisdictions, including CySEC, FCA, ASIC, BaFin, MAS, AMF, DFSA with turn-key solutions to optimize and automate their trading platforms.

We strive to build long-lasting partnerships that allow us to provide our clients with cutting-edge technology that meets constantly evolving requests from both the trading community and regulators.

If the products and services found in this brochure pick your interest, don't hesitate to contact us for more information. We'd be happy to tell you about our offers and arrange a demo for any of our solutions.

**Kind regards,
The Brokeree Team**

Social Trading

CTRADER

CUSTOM PLATFORMS

Brokeree Social Trading allows brokers to create intra-brokerage signal-sharing systems on multiple trading platforms. This unprecedented freedom allows brokers to unite clients across all servers into **a single investment pool** where they may share and copy trading signals without technical limitations.

Traders may monitor elaborate ratings and statistics and copy trades from registered providers with several modes and filters. For experienced traders, the solution allows them to receive money from shared results by configuring the amount of performance fee and the frequency of the payout for their followers.

↙ Trades are copied across all connected servers

Cross-Server Key Advantages

- Unified web portal for traders and their follower
- Variety of copying mode
- Easily integrable with CRM via REST API
- Android and iOS apps

How to attract & retain clients

Social Trading

- MT4
- MT5
- CTRADER
- CUSTOM PLATFORMS

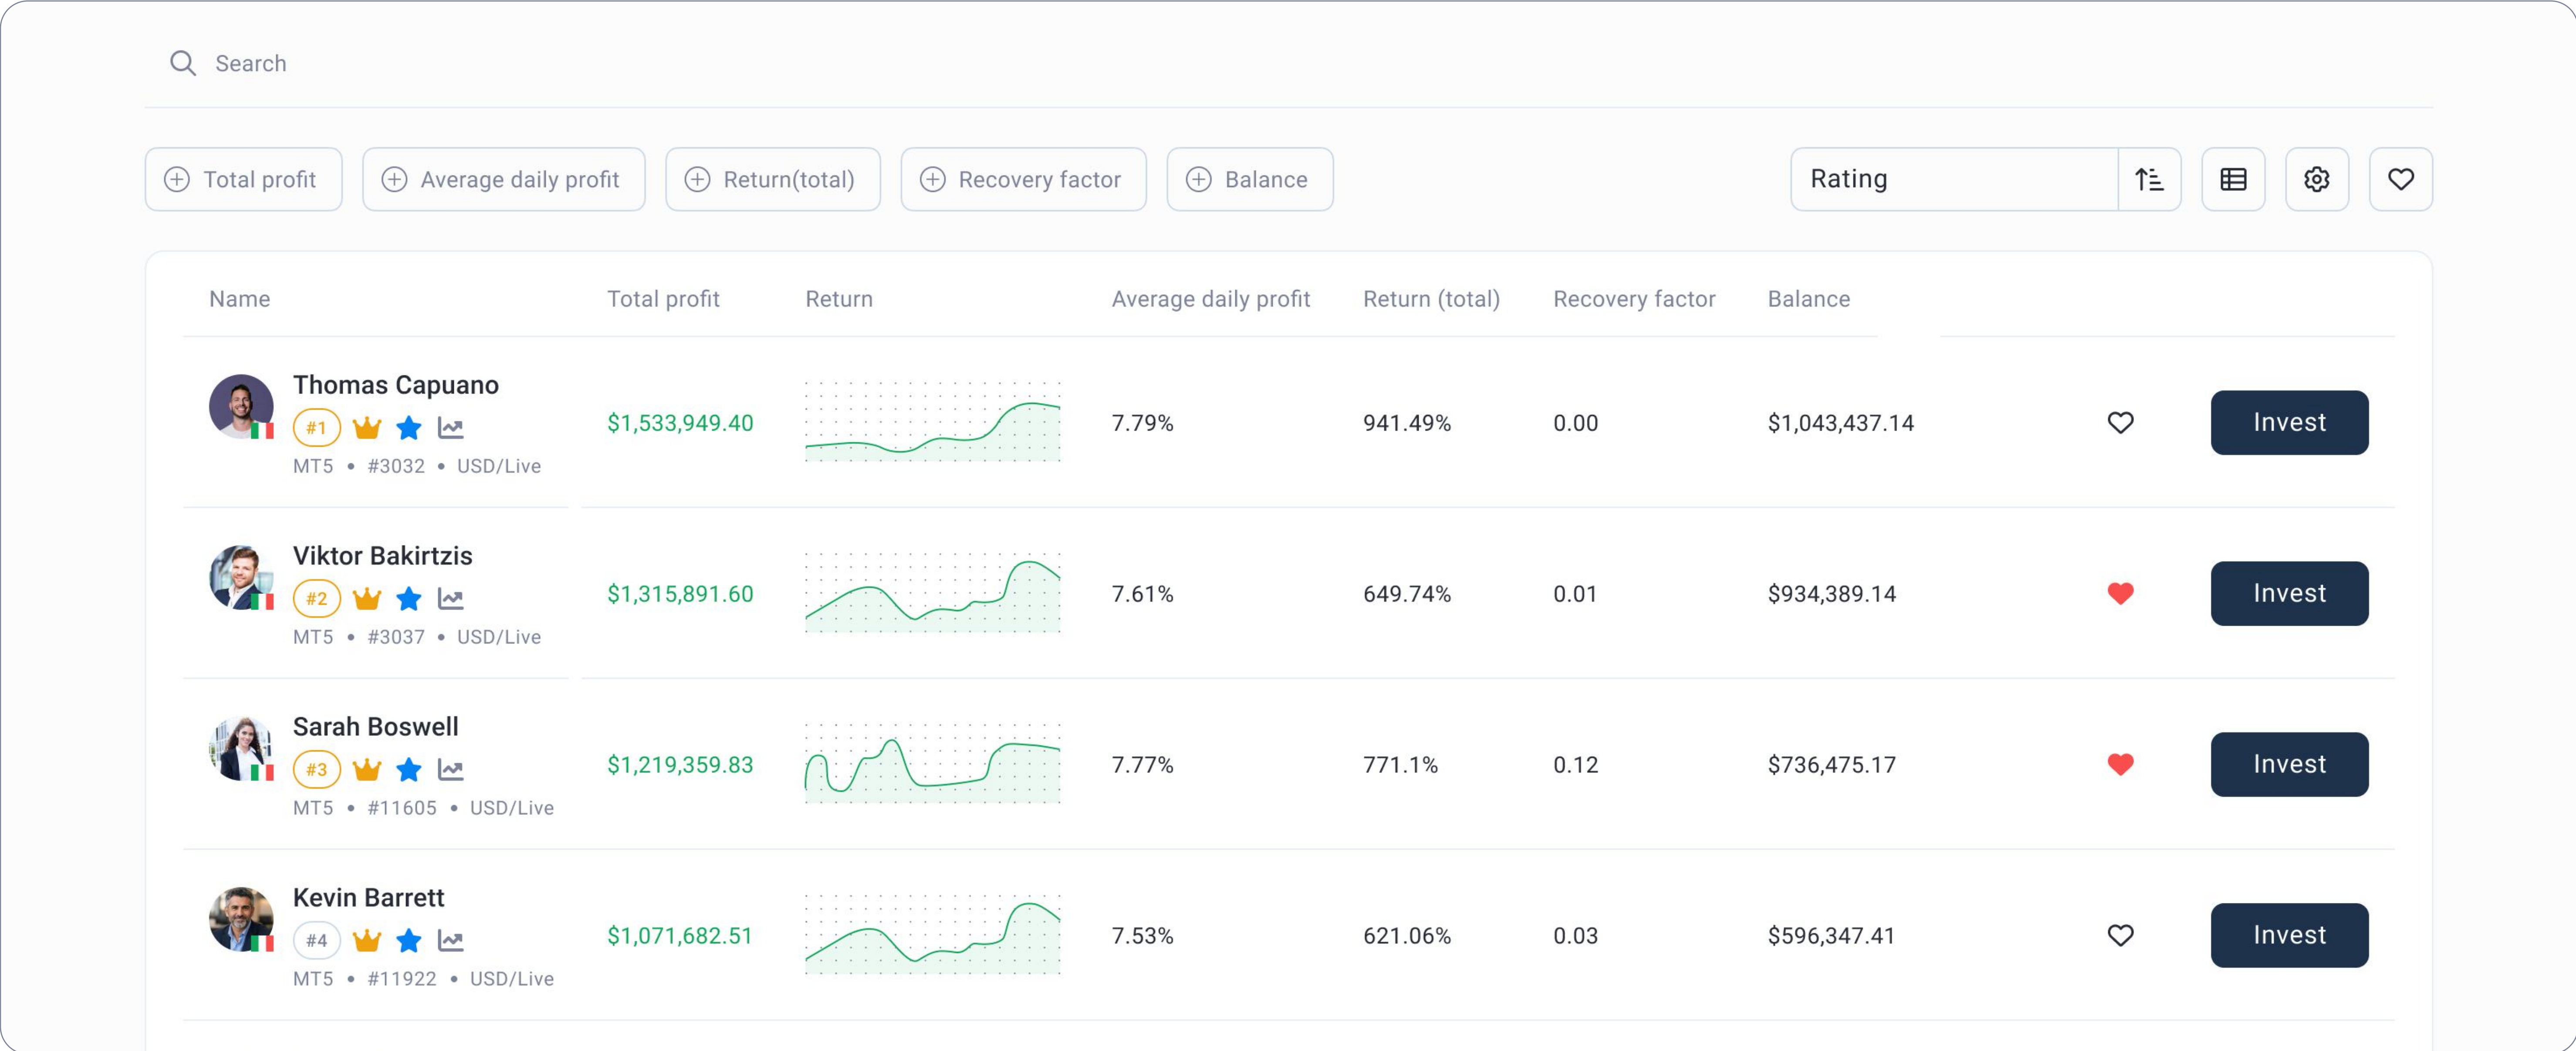

Brokeree’s Social Trading is a proven solution with institutional-grade risk logic, originally built for MetaTrader environments and now available for crypto exchanges via Integration API.

Key Advantages

- Multi-asset support across all instruments available on your crypto exchange
 - Flexible, customizable leaderboard with configurable widgets per market
 - Unified web portal for traders and followers
- Built-in risk management, traders define their own loss limits
 - Dedicated maintenance and update team, no internal dev resources required
 - API or plugin deployment, integration method is your choice

Ratings Module

Ratings Module allows brokers to set up interactive, colourful and elaborate leaderboards displaying their top-performing traders and providing their clients with effective means to analyze and follow a provider of their choice.

Organize trading competition by automatically populating the widget with participants and measuring traders’ performance by a custom rating point.

Ratings Module

Introduce interactive charts and graphs

Create widgets with **Ratings Module** to display top performing traders and provide investors with effective means to analyze and follow a provider of their choice.

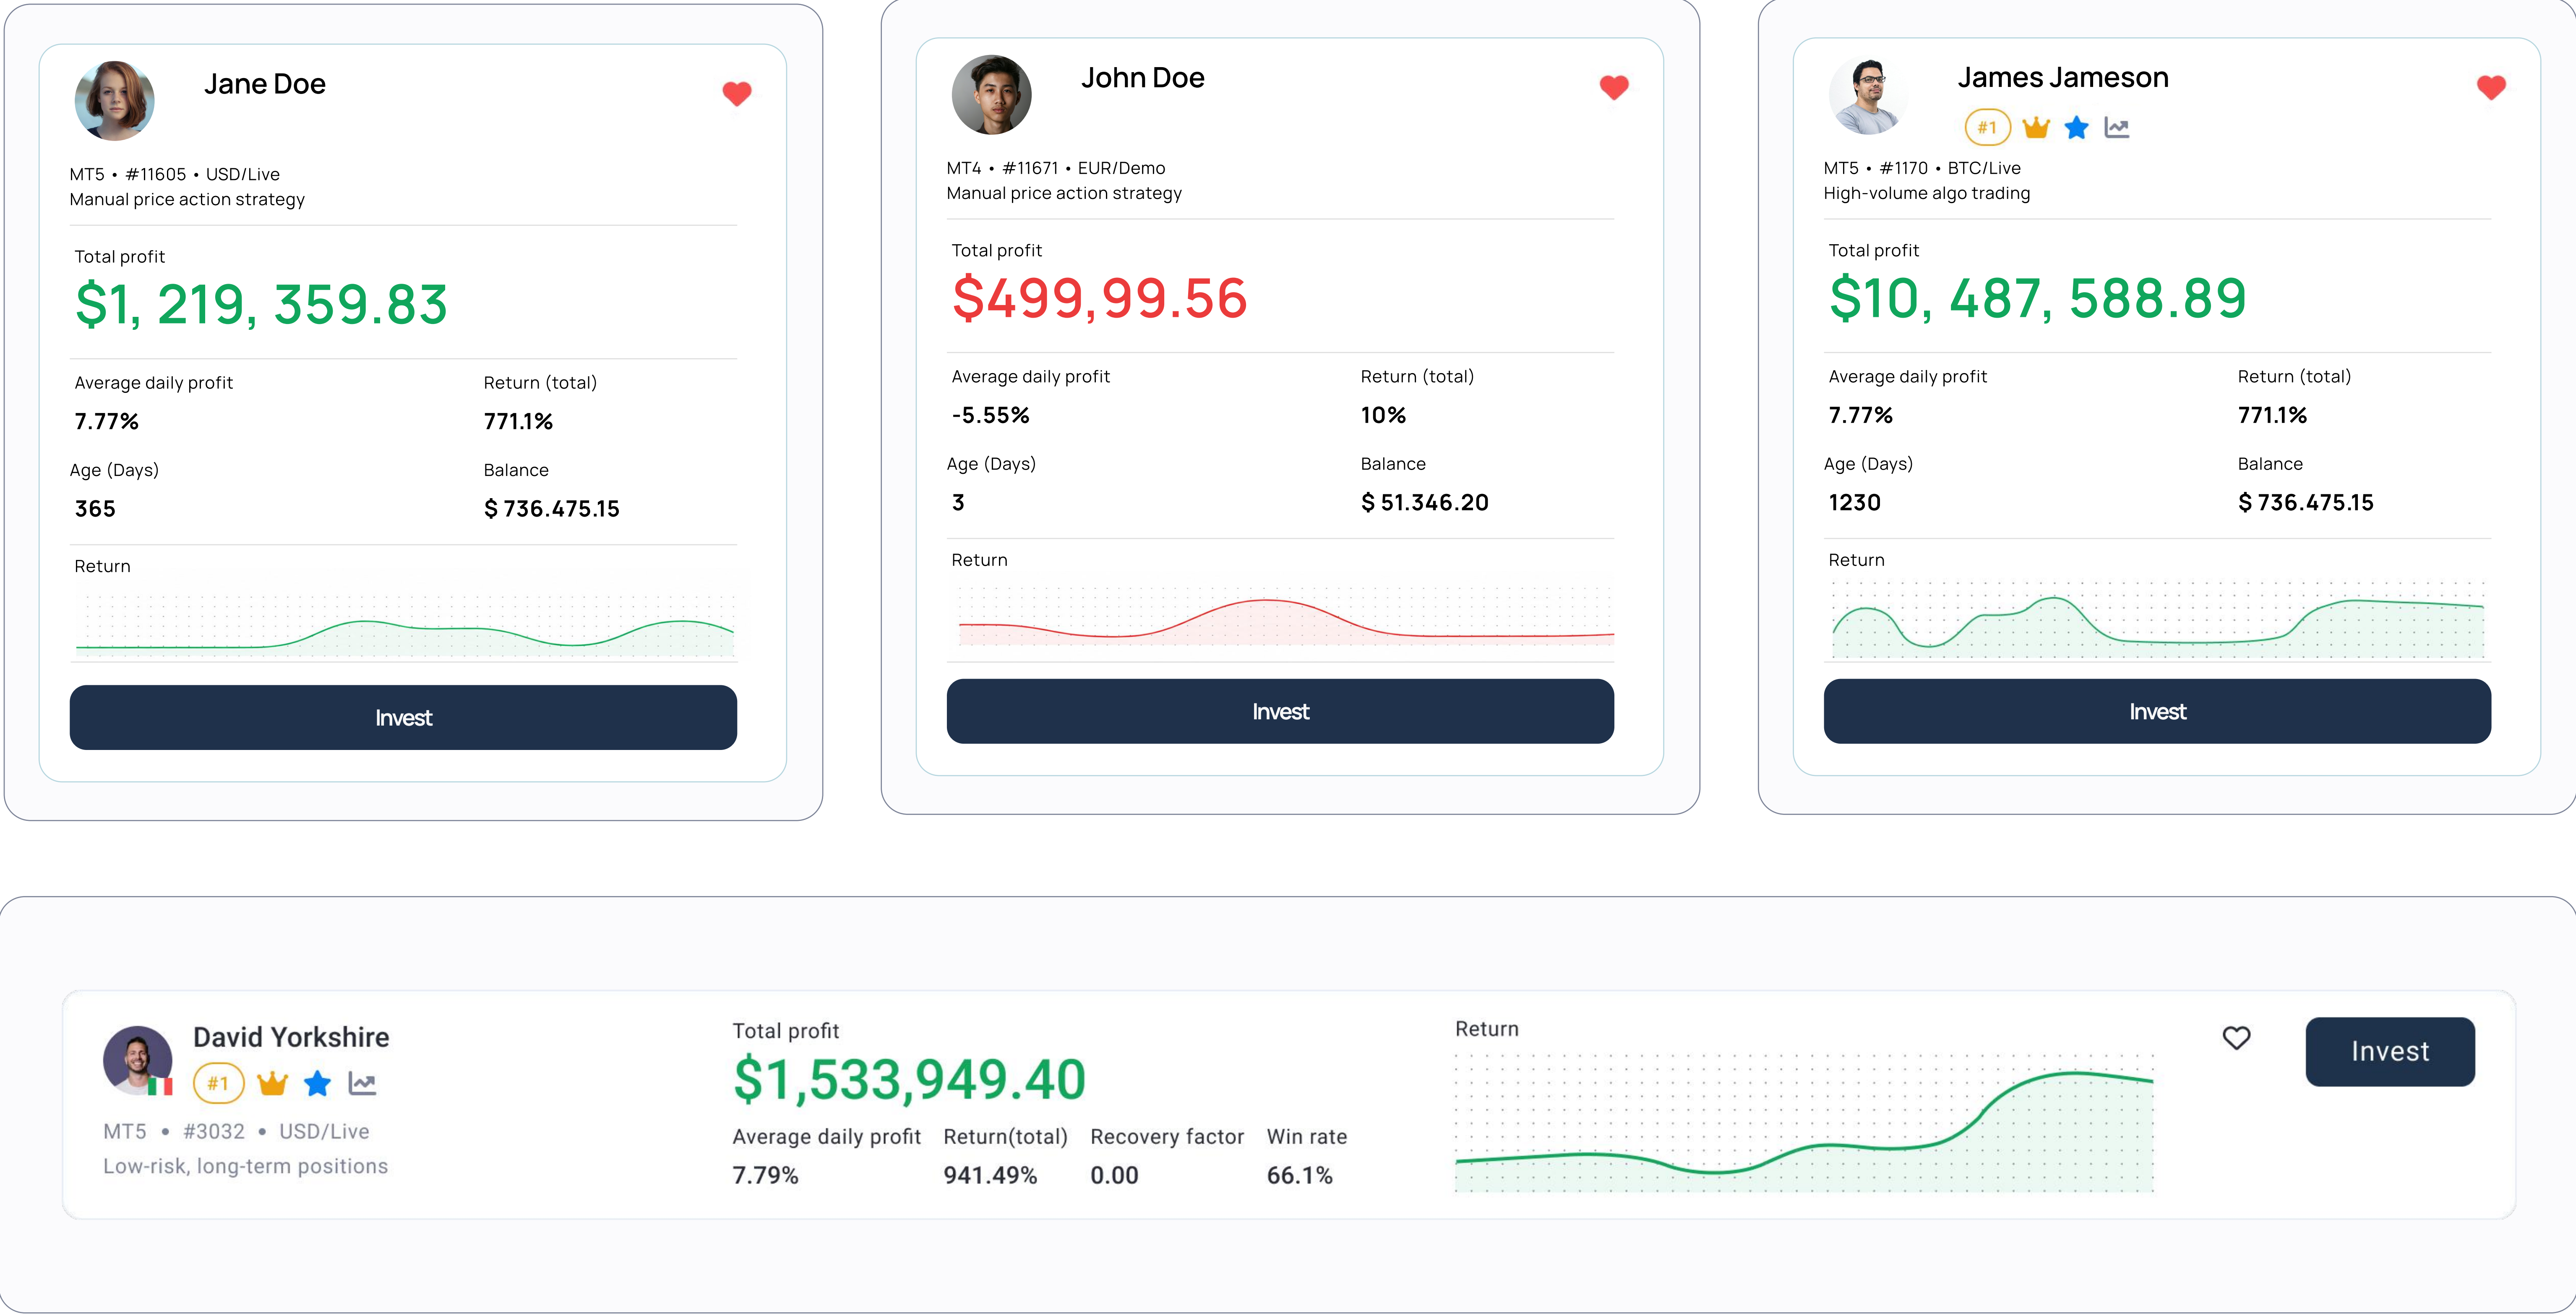

Key Advantages

- Seamless integration with Social Trading and PAMM
- Detailed trading and performance statistics
- Customizable widgets
- Badges to highlight traders

Track clients' performance

Convert website visitors into new clients

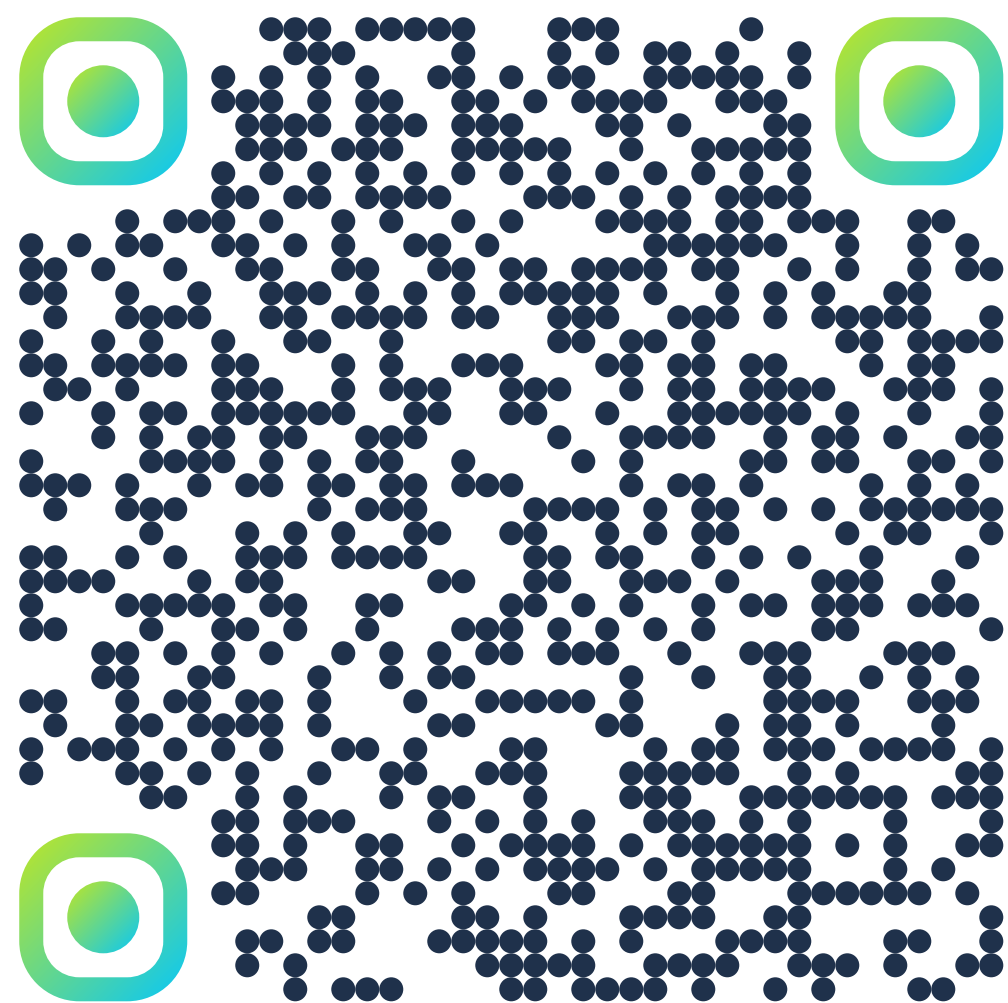

Launch traders competitions

Commemorate traders achievements with custom badges and highlight important information, like the fact that they use an EA for trading or have gained more than 50 followers.

- Automated Trading with EA
- Verified Trader
- Popular provider

Admin Portal

There are separate web portals for administrators, signal providers and followers in Social Trading. This way, all user categories can focus on their individual goals.

Flexible customization for brokers

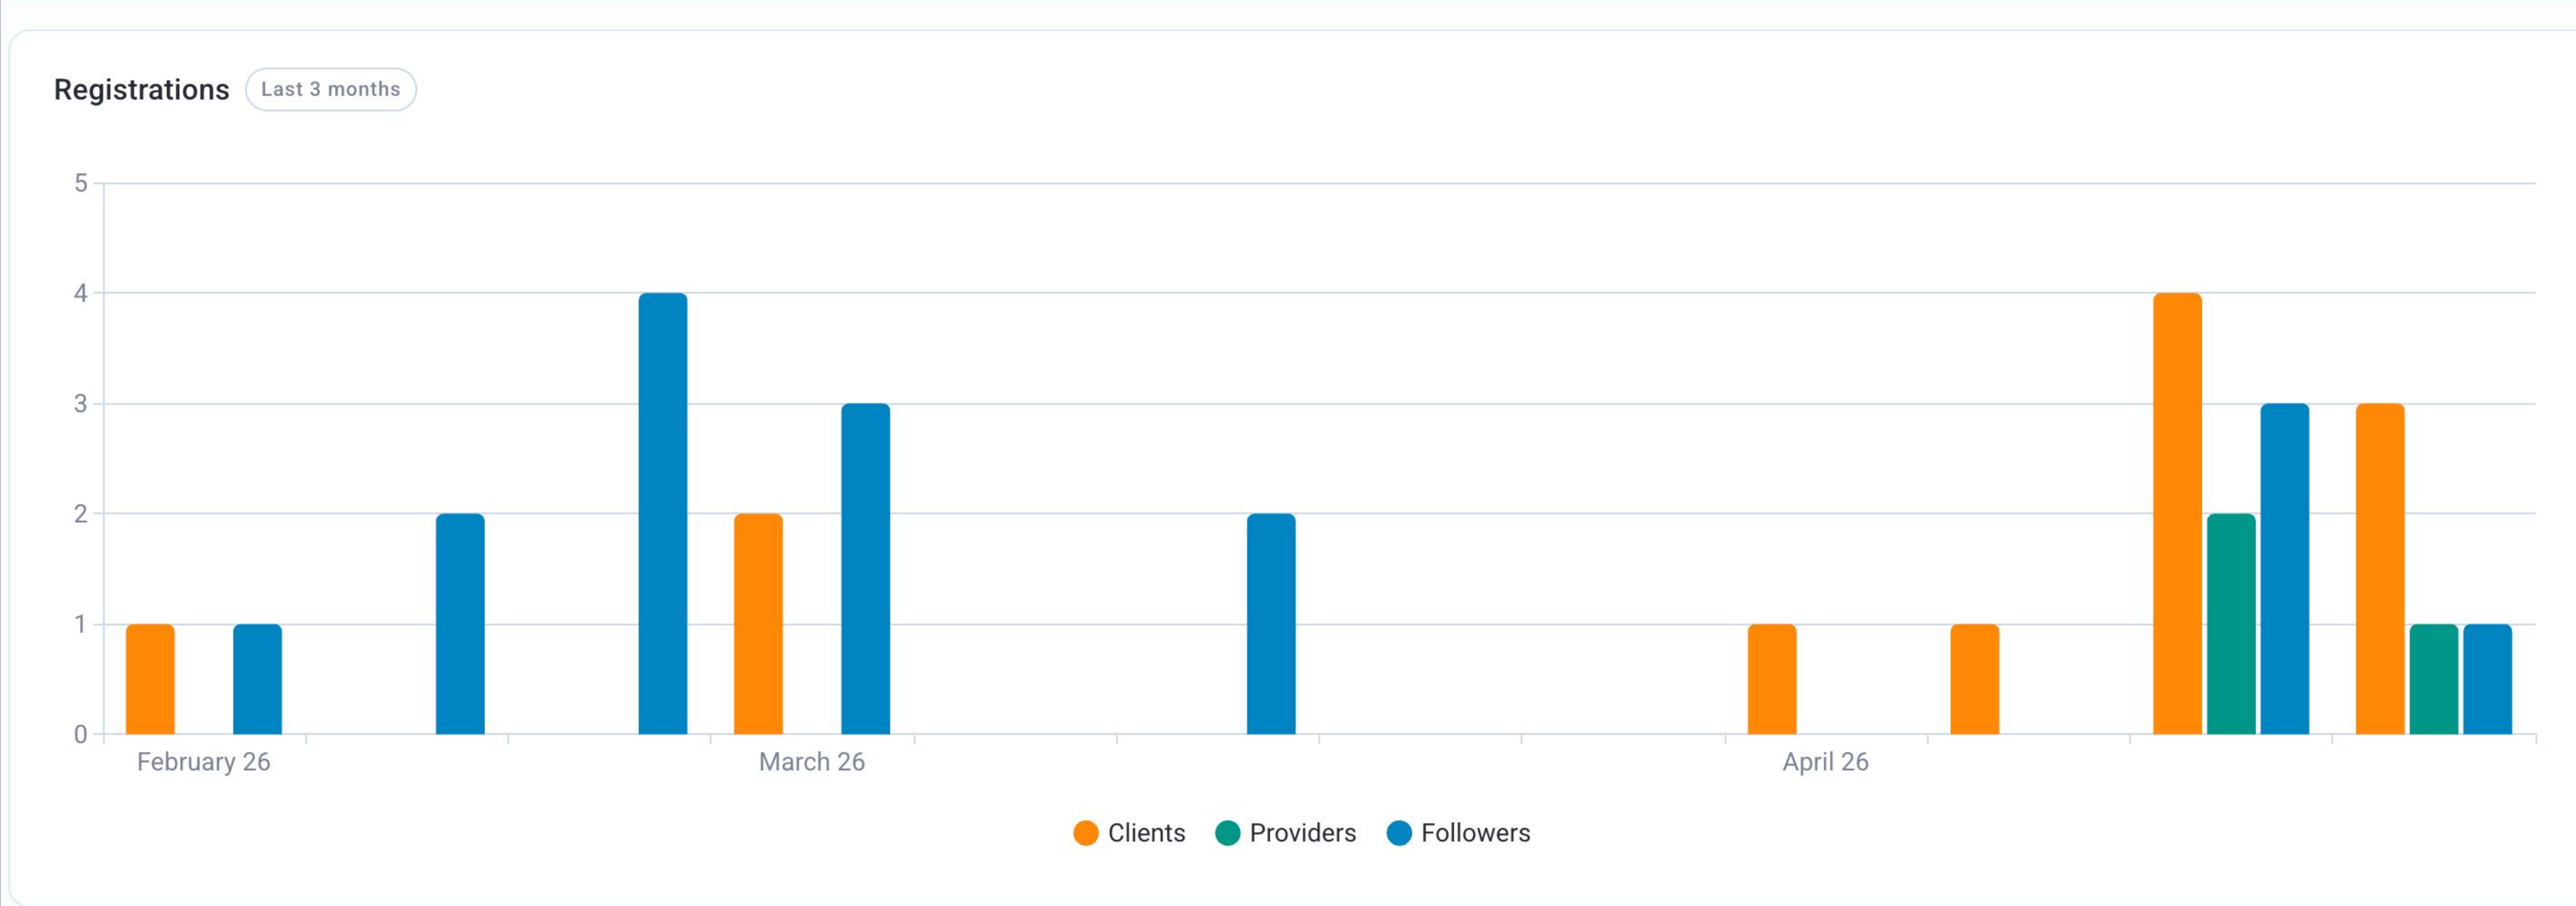

The solution gives brokers complete freedom to **fine-tune a platform** and configure different trading conditions for various groups of users.

- Different account types according to broker's offer, e.g. demo, live, pro
- Each trader role: provider or follower
- Specific MetaTrader 4 and 5 servers

Users

This displays the registration trends over time for all portal entities: clients, providers, and followers. Can be used to track growth, spot spike, and monitor user engagement

Clients 714 Active	707 Idle	Providers 45 Active	0 Out only	4 Without followers	Subscriptions 16 Not activated	1230 Active	23 Suspended
---	--------------------------------	--	----------------------------------	---	---	-----------------------------------	------------------------------------

Risk mitigations for brokers

Part of operational risks may be covered by the restricted administrators feature. It creates **a hierarchy of management decisions on the platform** and accurately distributes the necessary powers among personnel using the solution.

Client Portal

There are separated web portals for administrators, traders in Social Trading. This way all categories of users can concentrate on their individual goals.

Copying modes for followers

Brokeree Social Trading provides all traders with a flexibility to finetune their own trading strategy even when they follow signals. The solution offers followers **different copying modes** based on multiple indicators, including balance, equity and multiplier.

Copy strategy

Setting up the difference between source and copied trades

Volume scaling *

Autoscale

Autoscale

Multiply

Fixed

Lots proportion

Compared value, multiplied by Volume per step.

Compared value *

Equity

The value to compare between the provider and follower accounts. Their ratio will be equal to the ratio of source and copied deals' volumes.

Ratio multiplier *

1

Number to multiply the Compared values' ratio by

Cancel

Confirm

Add

Parameter *

A measure that is compared to the level to perform the automatic action

Threshold *

A value that is used to compare and perform the automatic action

Subscription action *

Actions in case the specified threshold is reached.

Trading action *

Actions in case the specified threshold is reached.

Cancel

Confirm

Copy strategy

Copy positions' modification settings

Volume scaling

Determines copies' volume modification method

Autoscale

The ratio of a copy's volume to the original volume is equal to the ratio of the follower's and provider's Compared values. The result is then multiplied by the Ratio multiplier.

Compared values

The value to compare between the provider and follower accounts. Their ratio will be equal to the ratio of source and copied deals' volumes.

Equity

Ratio multiplier

Number to multiply the Compared values' ratio by

1

Copy direction

Direction modifiers of copies. With the reverse direction, a buy source deal becomes a sell deal as a copy, and vice versa.

Direct

Flexibility for signal providers

To optimize incomes, traders may accurately finetune fees for followers. There are various available fee types in Social Trading that a broker may enable for their traders, including **performance**, **management** and **subscription fees**.

Mobile App

Stay in touch with clients even on-the-go

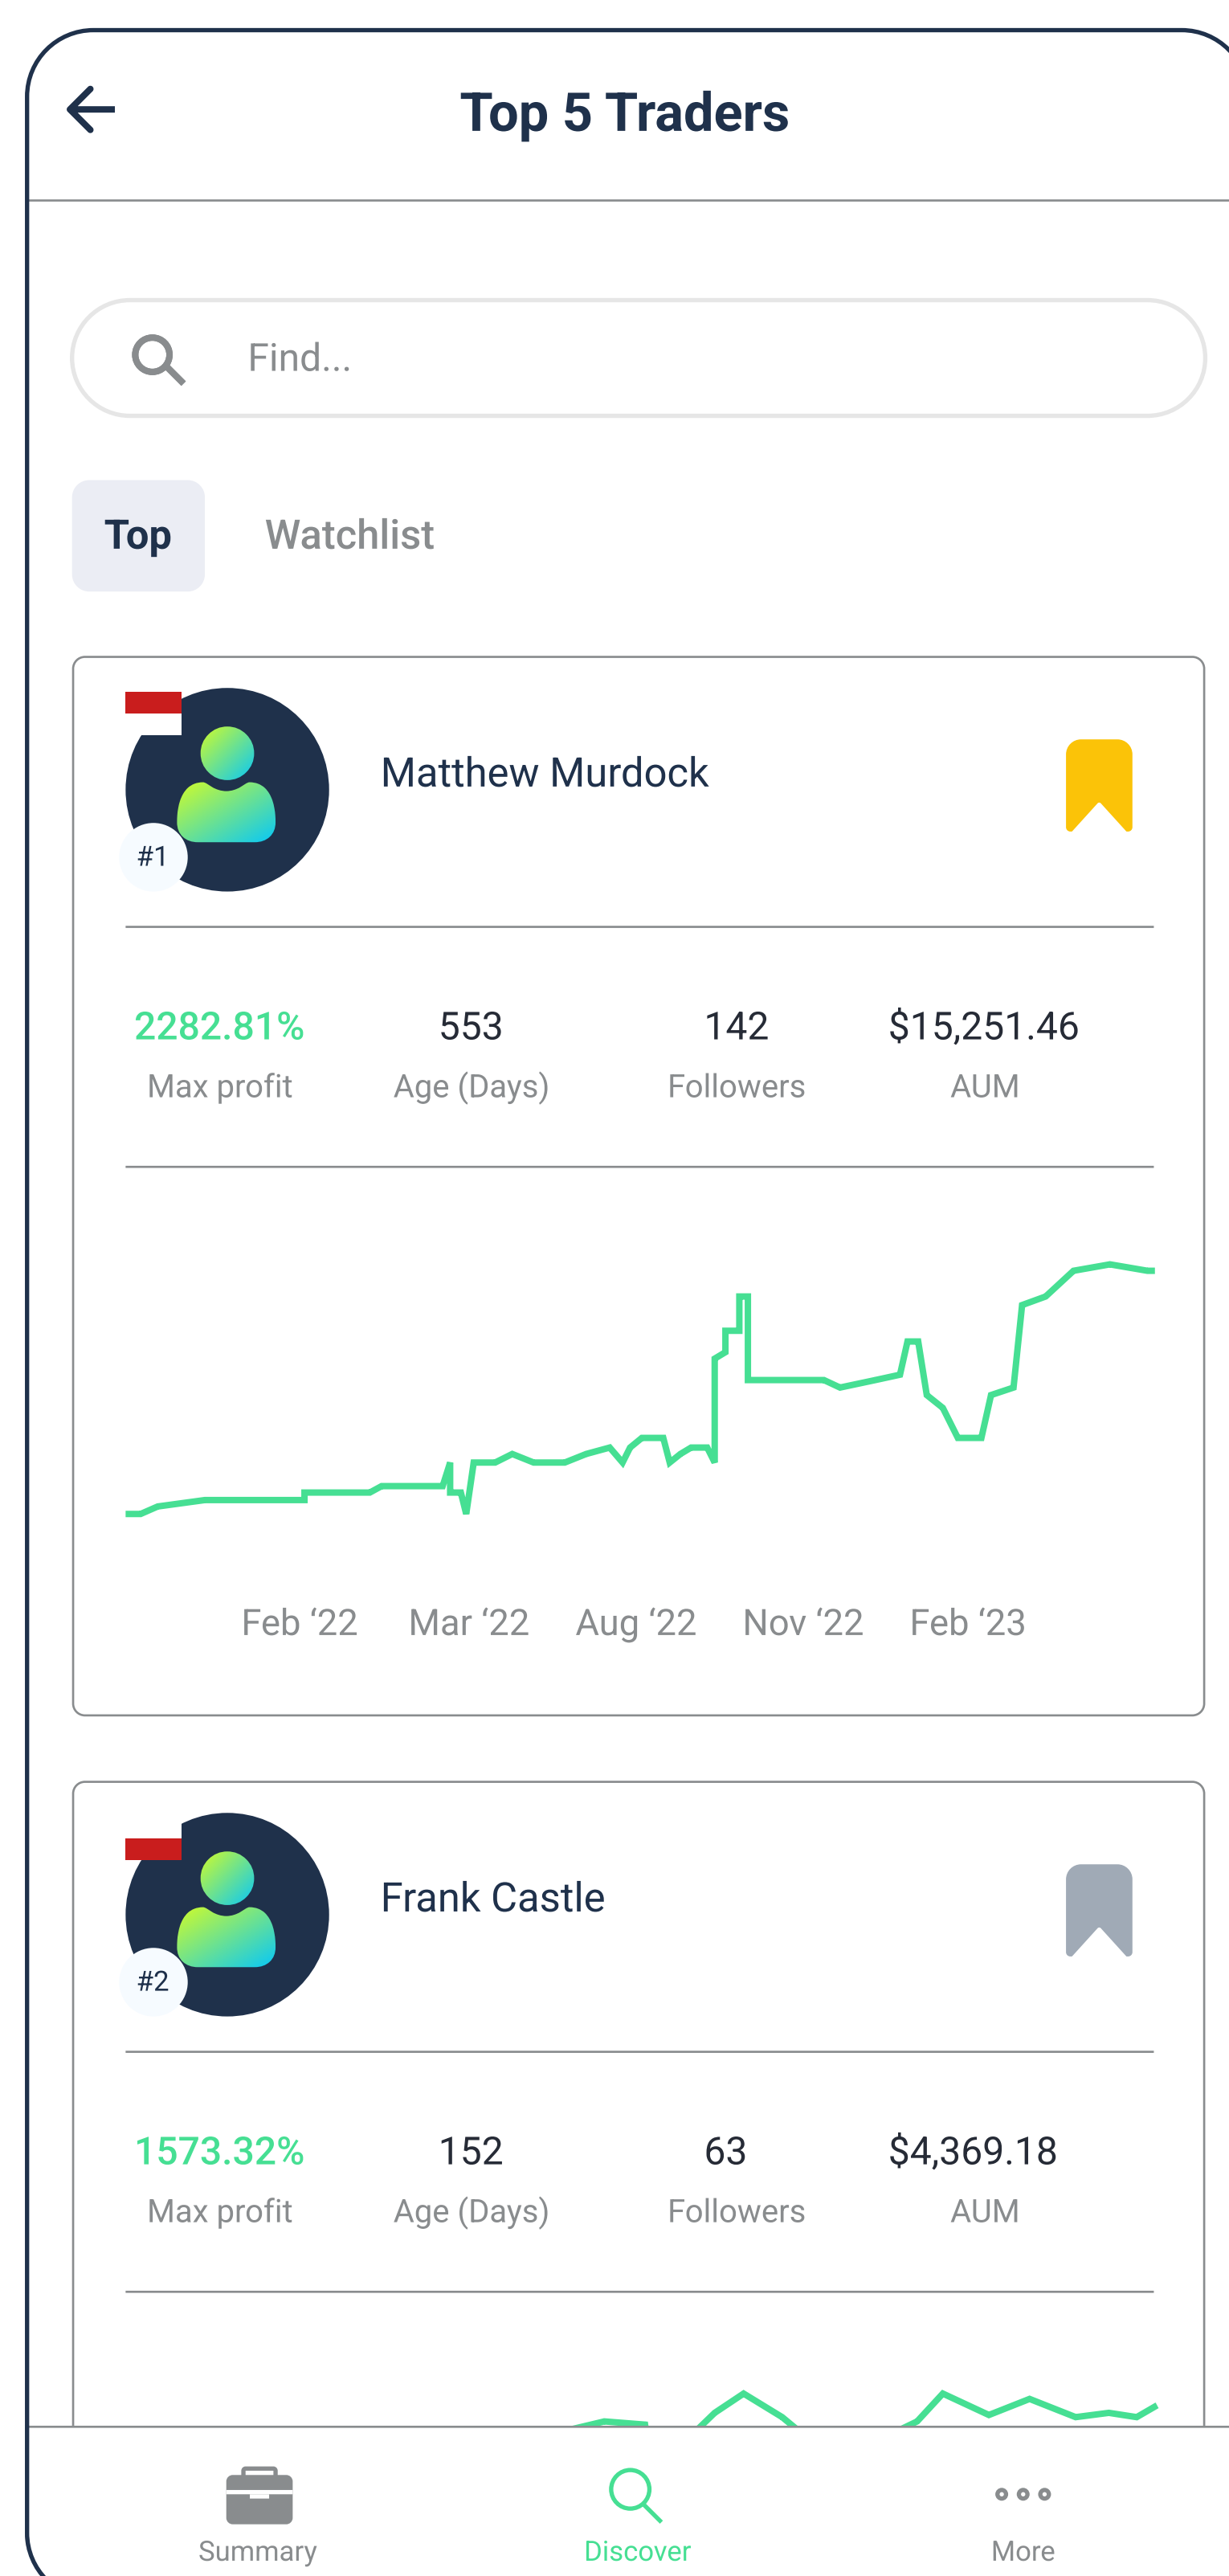

Introduce mobile experience for your clients with Social Trading Mobile App.

Features

- Push notifications for risk management and daily reports
- App supports 15 languages, including Arabic, Thai, Portuguese
- Mobile app can be branded with brokerage's logo and colours
- Distribution on Apple Appstore and Google
- Play via brokerage's business accounts

How can I customize the app?

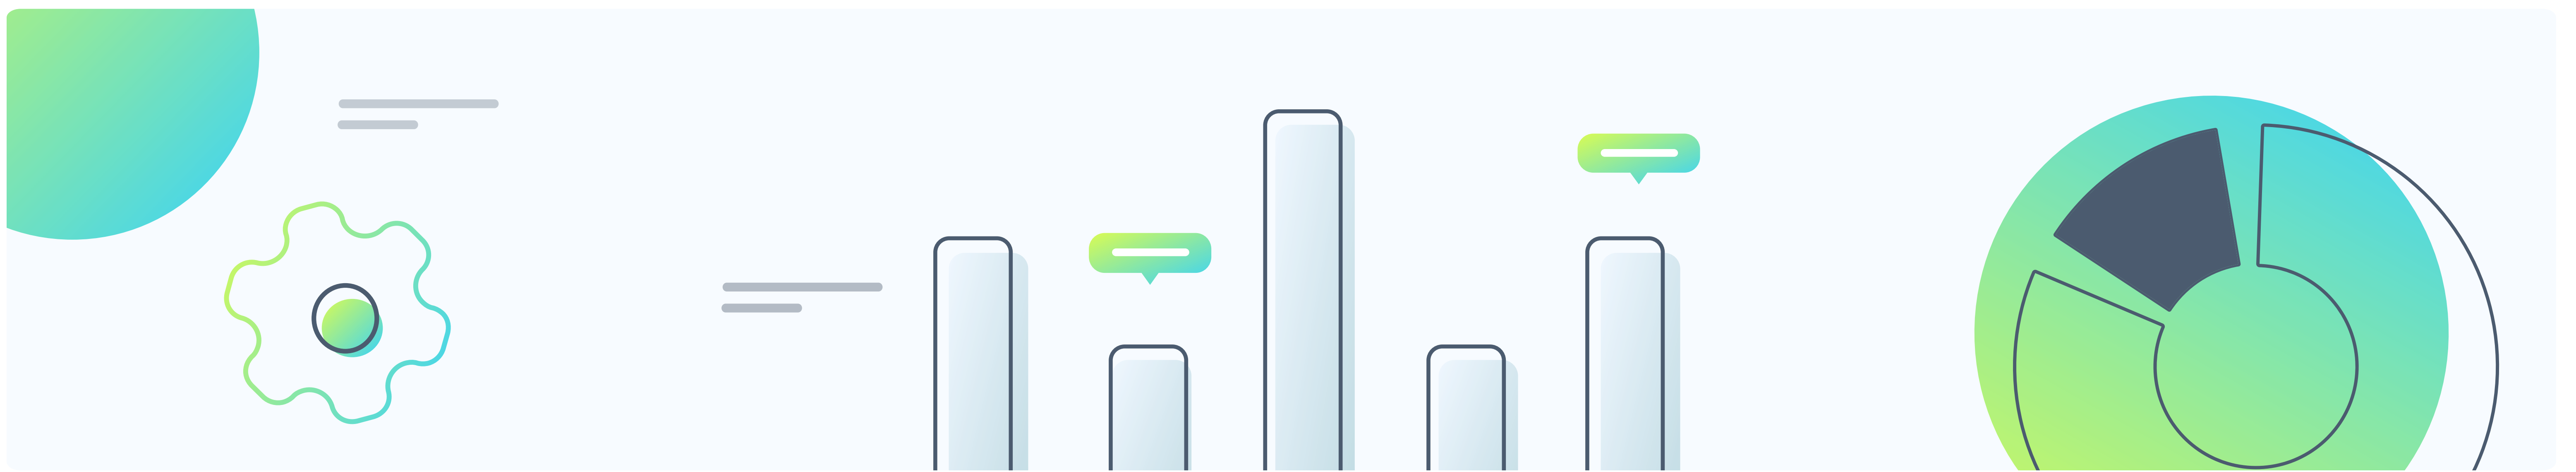

Interactive graphs

Various copying modes

The screenshot shows the 'Subscription Strategy' screen. It has a back arrow at the top. Under 'Follower push notifications', there are four settings, all with toggle switches turned on: 'Positions' (Send an update daily on copied positions), 'Paid fees' (Send an update daily if performance or management fees were paid), 'Due fees' (Send a notice 1 day in advance if any management fees are due), and 'Risk management actions' (Send a notice if a risk management rule was triggered). Below these is 'Subscription suspended' (Send a notice if a subscription was suspended by the system automatically). Under 'Provider push notifications', there are two settings, both with toggle switches turned on: 'Fees received' (Send an update daily on fees received from the followers) and 'New followers' (Send a notice on new followers).

The screenshot shows the 'Subscription Strategy' screen. It has a back arrow at the top. Below the title, there's explanatory text for four modes: 'Autoscale', 'Multiply', 'Fixed', and 'Lots proportion'. Below this text are four radio button options: 'Autoscale' (selected), 'Multiply', 'Fixed', and 'Lots proportion'. Below these is a text input field for 'Ratio multiplier' with the value '2'. At the bottom, there's a green 'Save Changes' button.

PAMM

← Portfolio management

MT4

MT5

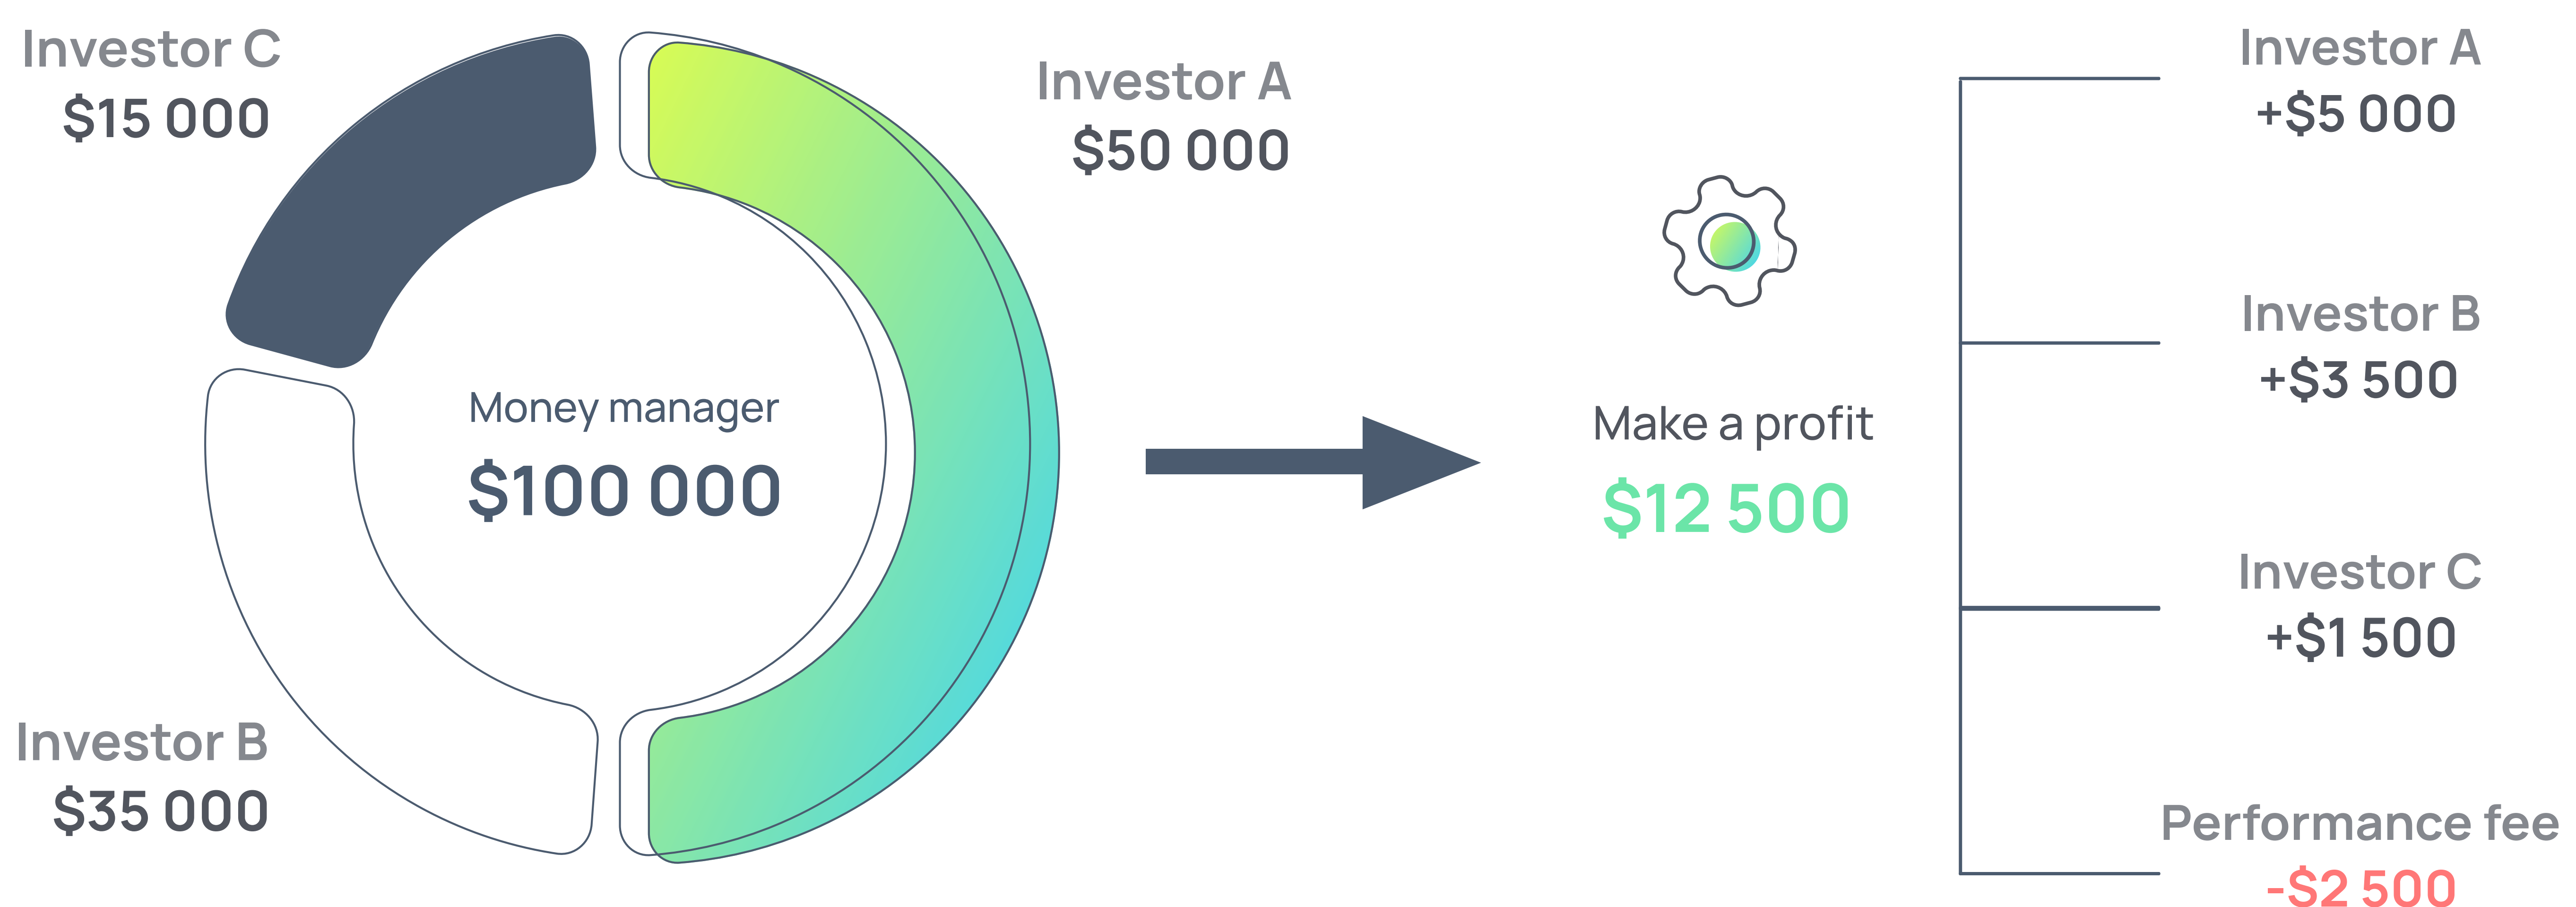

CTRADER

Allow clients to invest with smaller deposits

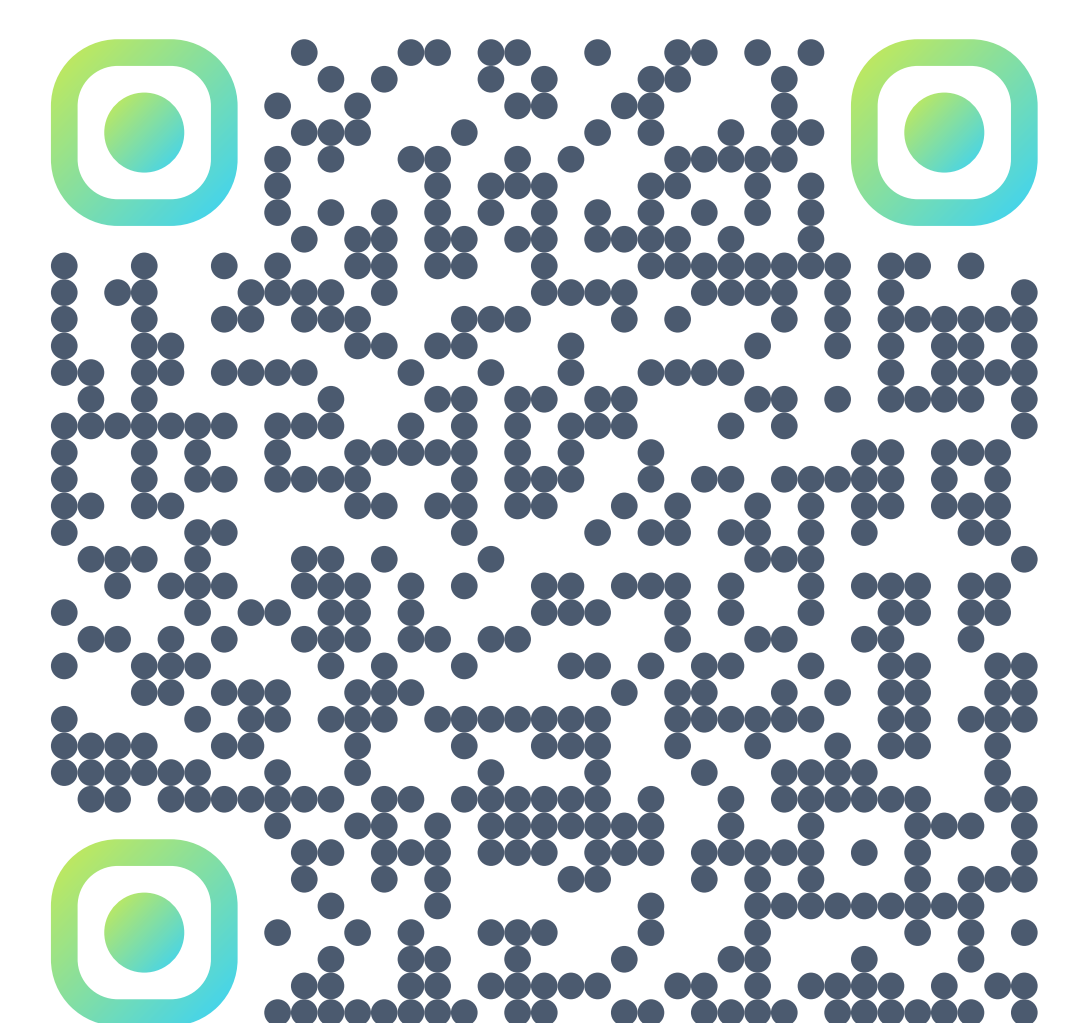

Money management solution, designed to attract new clients and increase trading volumes.

Based on the special shared accounts, the solution offers traders new trading options: to invest in the accounts run by the successful traders or even manage a PAMM account themselves.

Key Advantages

- Web portals for investors and money managers
- Flexible performance fees and commission calculations
- Investors may join shared accounts even from different servers
- No trading limitations for money managers
- Available in 15 languages, including Arabic, Hindi, Thai, Malay
- Integrated with leading CRM providers

Schedule demo

Prop Pulse

Prop trading challenges

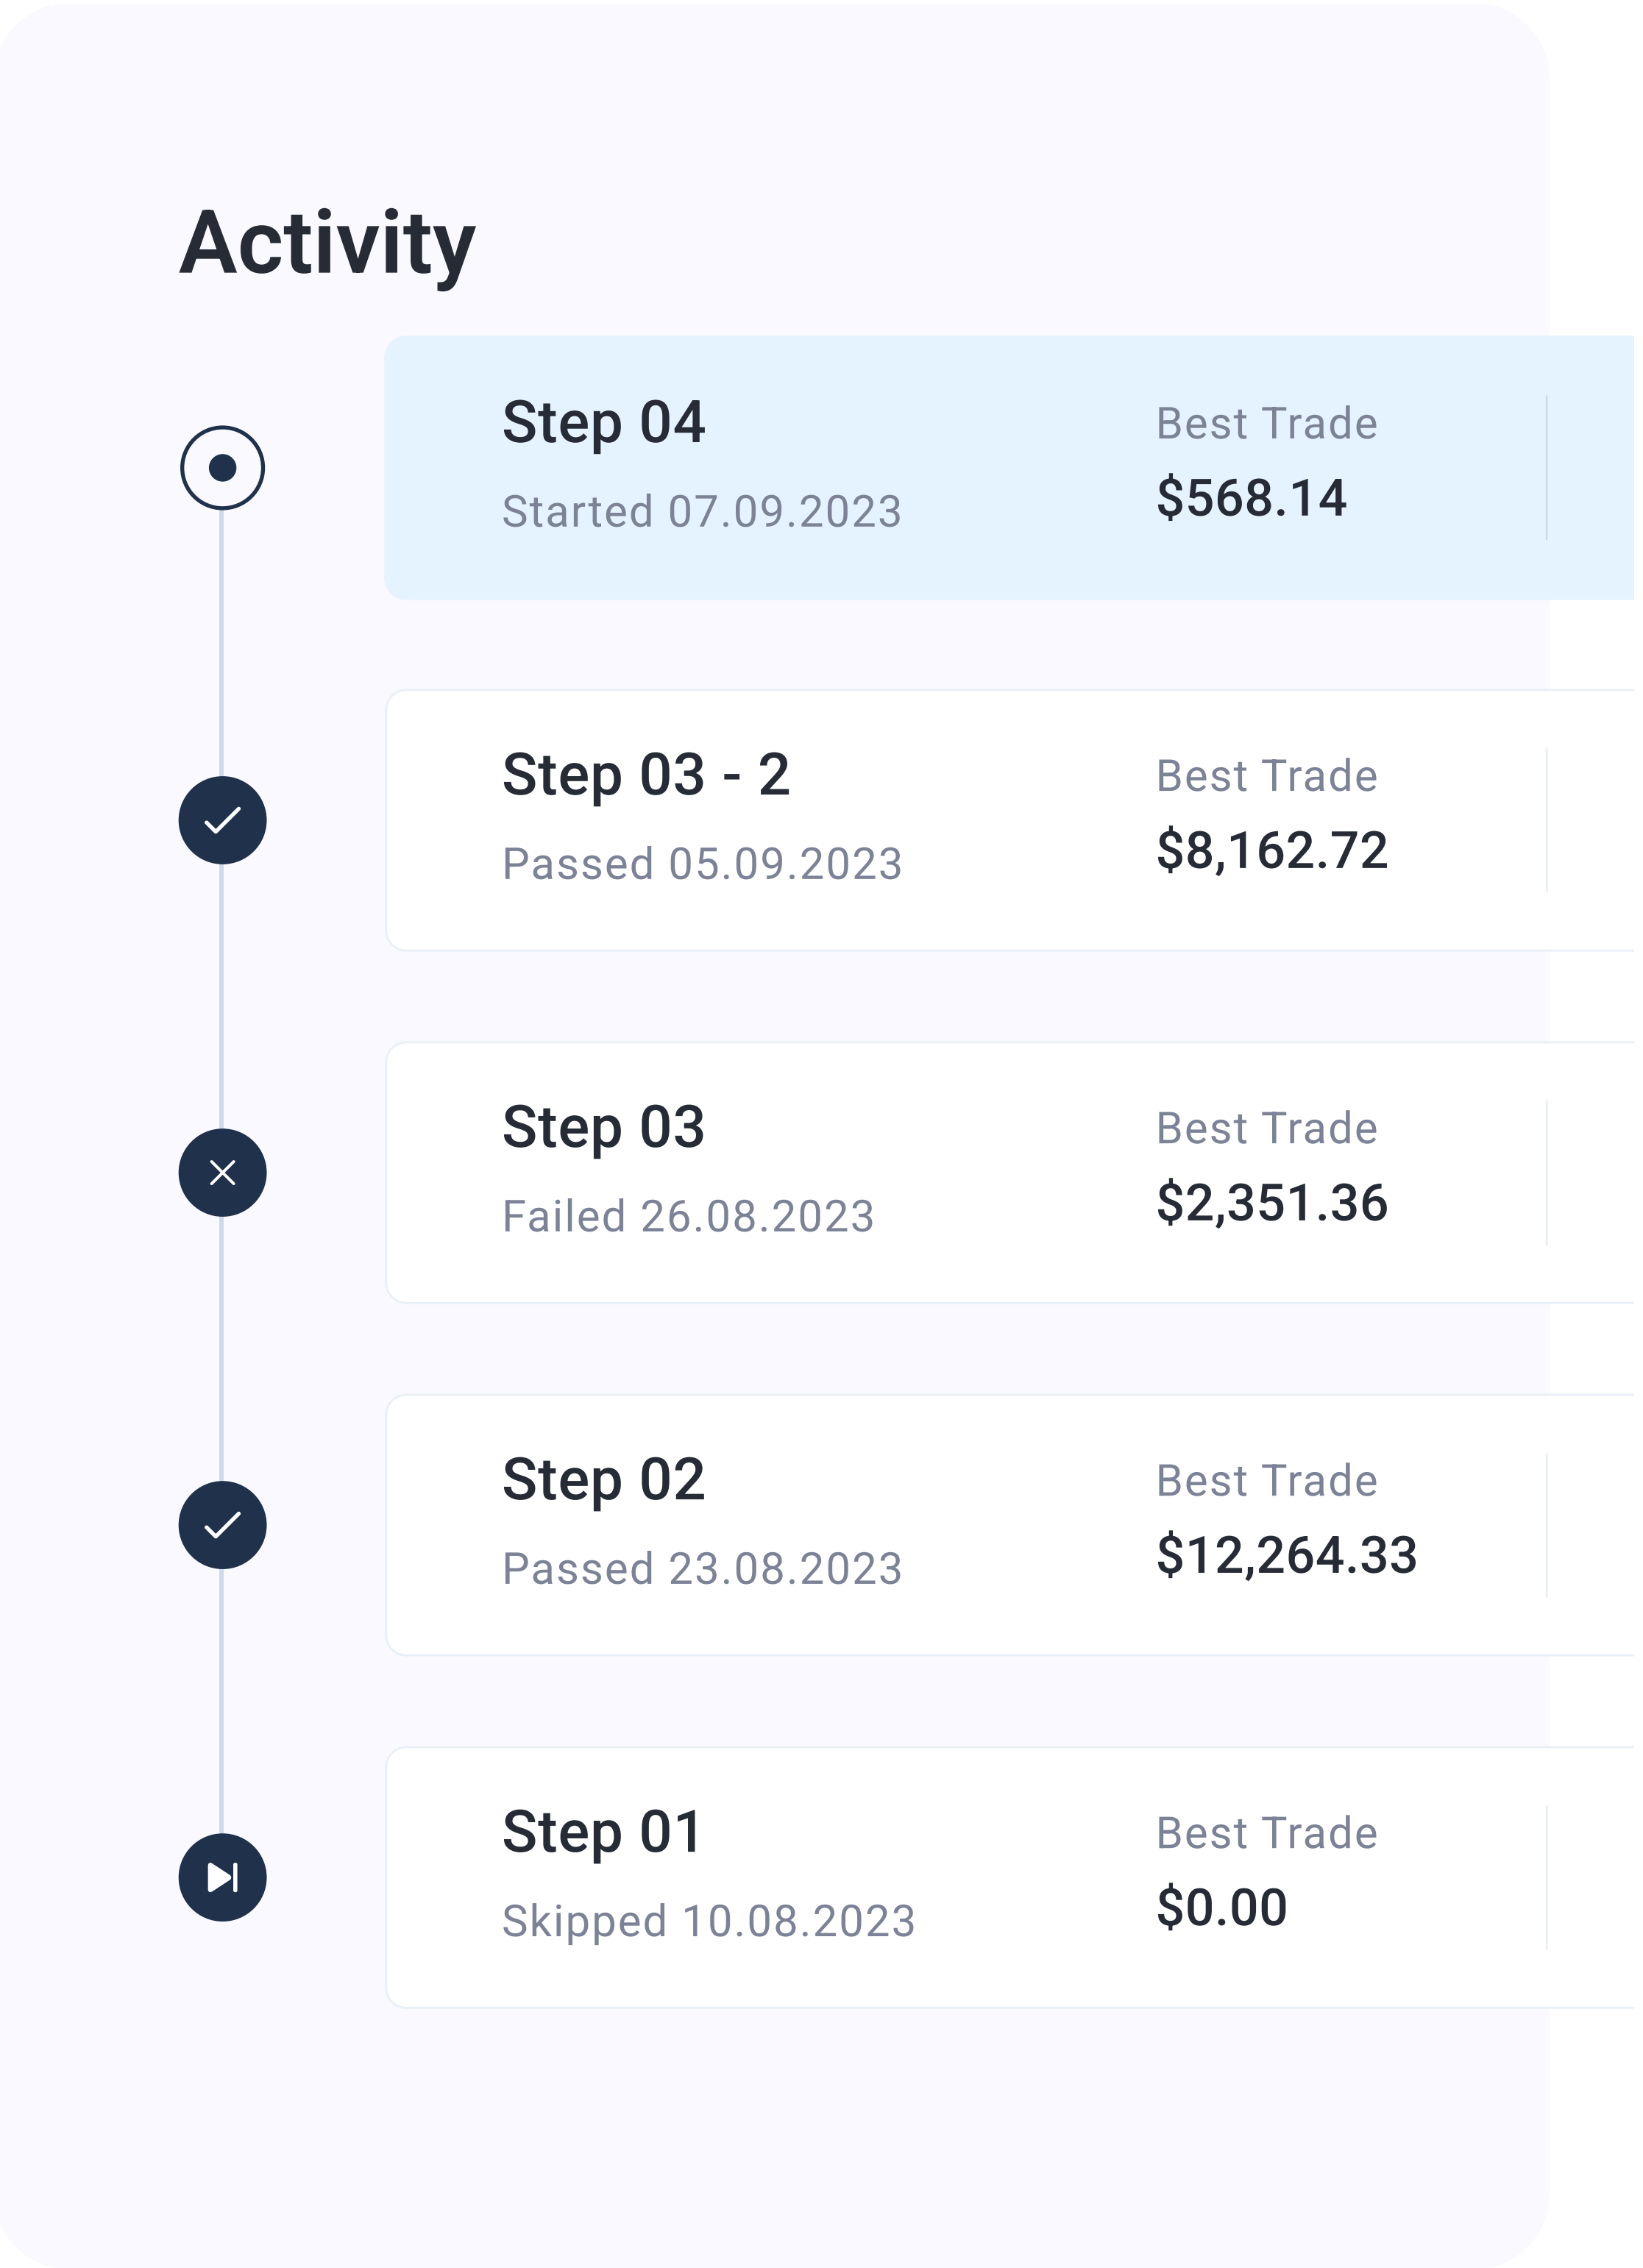

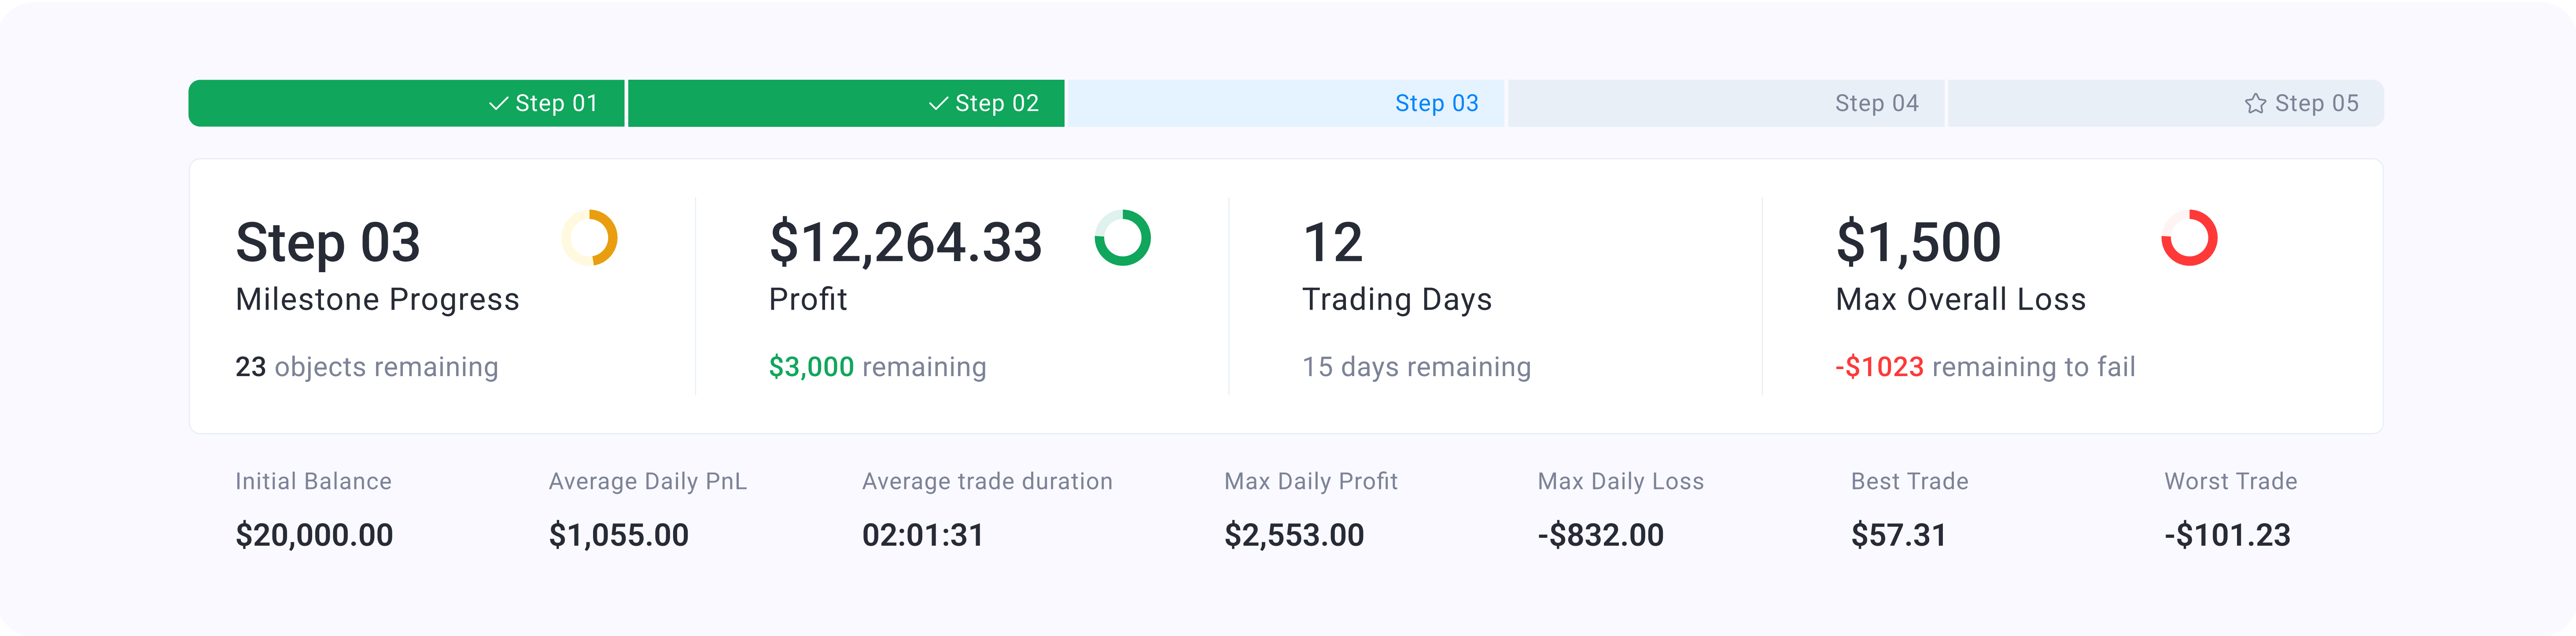

A solution for established brokerages and prop trading firms to set up trading challenges to verify traders proficiency and monitor their performance.

- ### Challenges

 - Evaluation phase
 - Funded / partnership phase
- ### Dashboards

 - Objectives & scaling levels
 - Performance metrics
- ### Risk Management

 - Constraints
 - Read-only accounts

Review Participation History

Activity section represents a complete client journey through a specific challenge, including successfully completed, skipped, failed or restarted steps.

Each step can be then reviewed separately for additional information about specific trading performance.

Liquidity Bridge

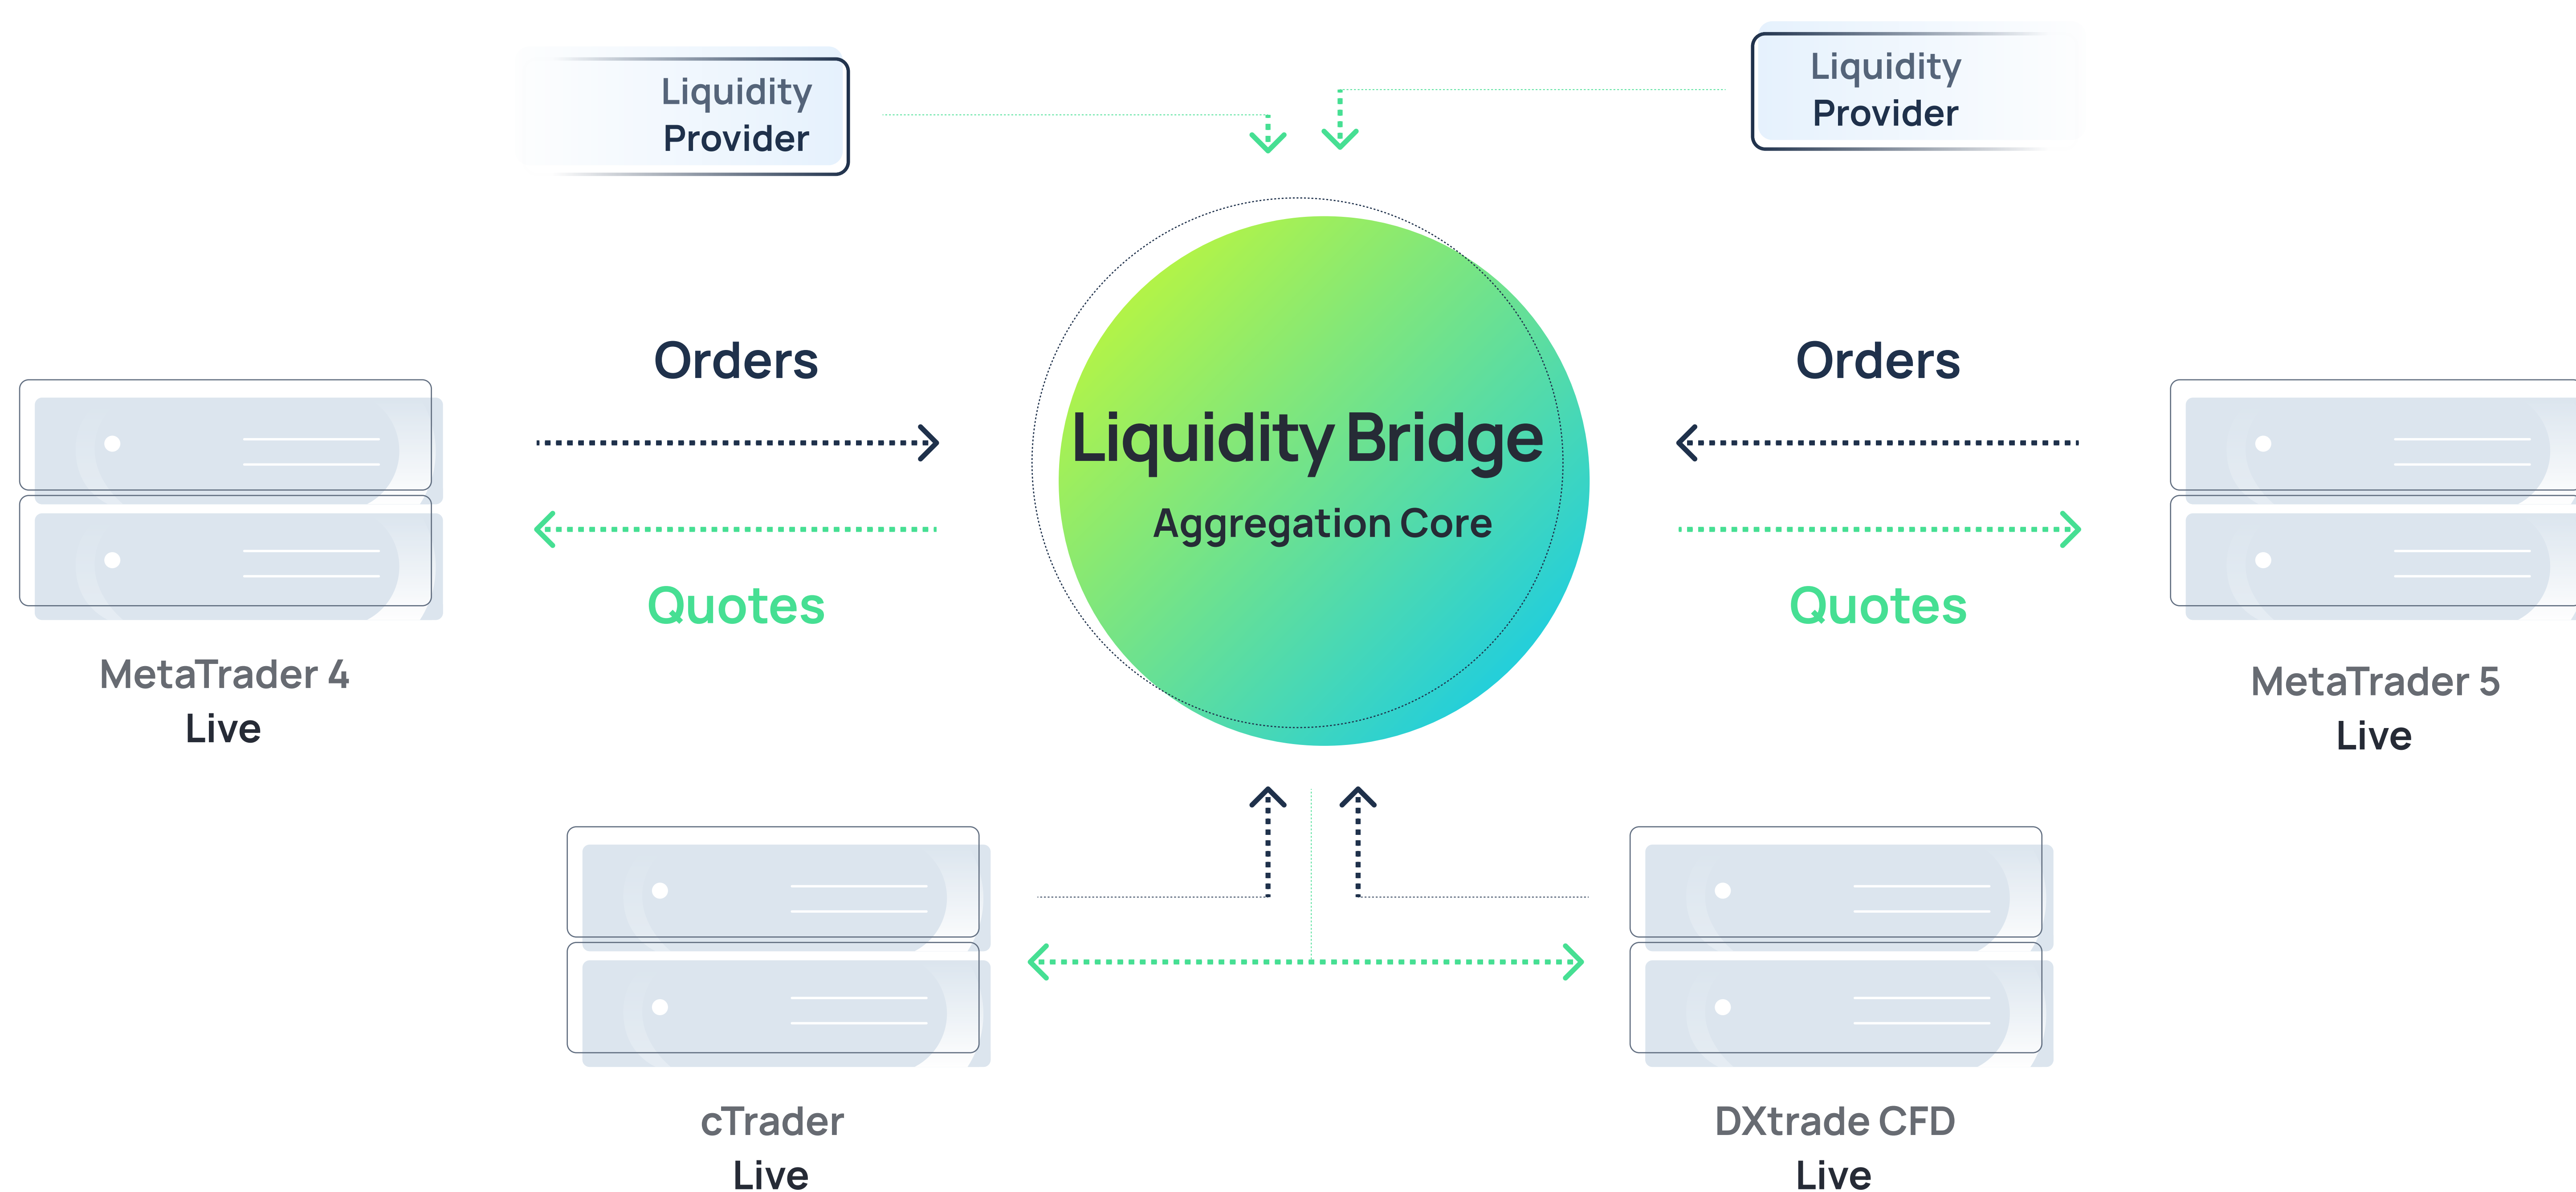

Adjust order execution model

Liquidity Bridge combines advanced order execution, smart liquidity aggregation, and risk management.

The solution has a flexible routing system that allows brokers to either hedge client trades at a liquidity provider or process trades in-house at the current price of the LP.

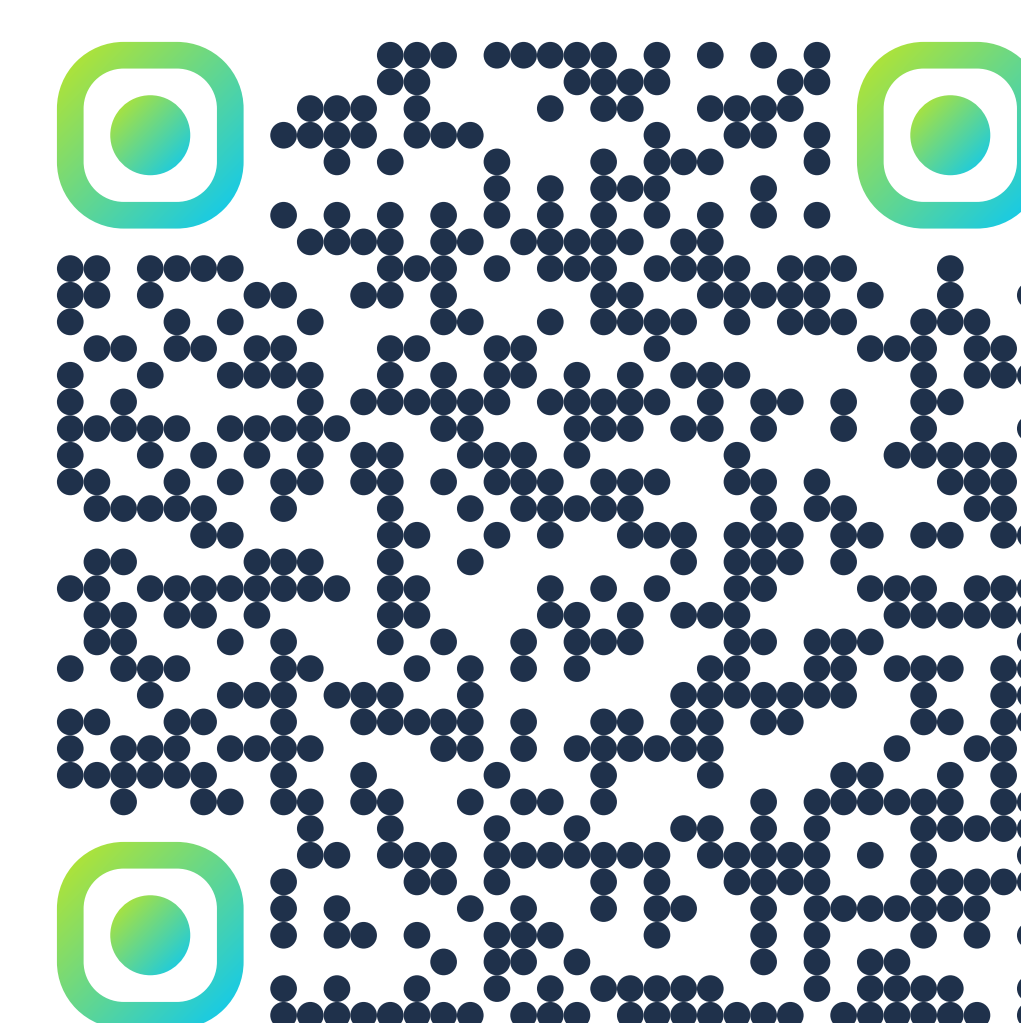

Connect multiple trading servers to an aggregated liquidity pool

Key Advantages

- Web-based administration portal
- Smart quotes aggregation
- Hybrid A/B books trade execution
- Monthly flat rate subscription with no volume fees
- Over 25 integrated liquidity providers
- Advanced routing rules

Hybrid execution model

You may also consider →

MT5 Gateway

Simple liquidity aggregation for pure a-book

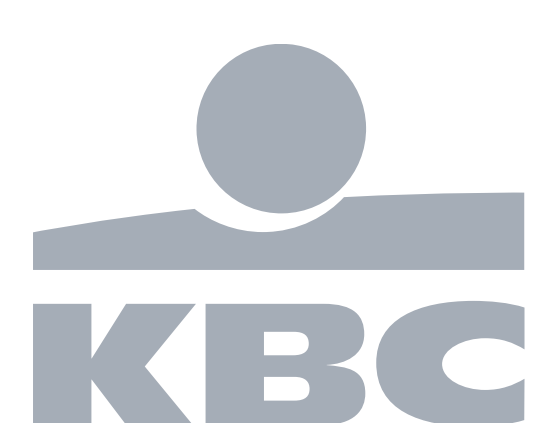

Receive quotes and send trade requests directly to a chosen liquidity provider.

Features

- Stream quotes from liquidity providers to the trading platform
- Automate option symbols settings synchronization
- Execute market orders directly at a counterparty
- Seamless integration

Full support of exchange listed stocks and options assets

Integrated with 9 liquidity providers

Client Retention Tools

Extended Agent Commissions

Reward IBs with bonuses

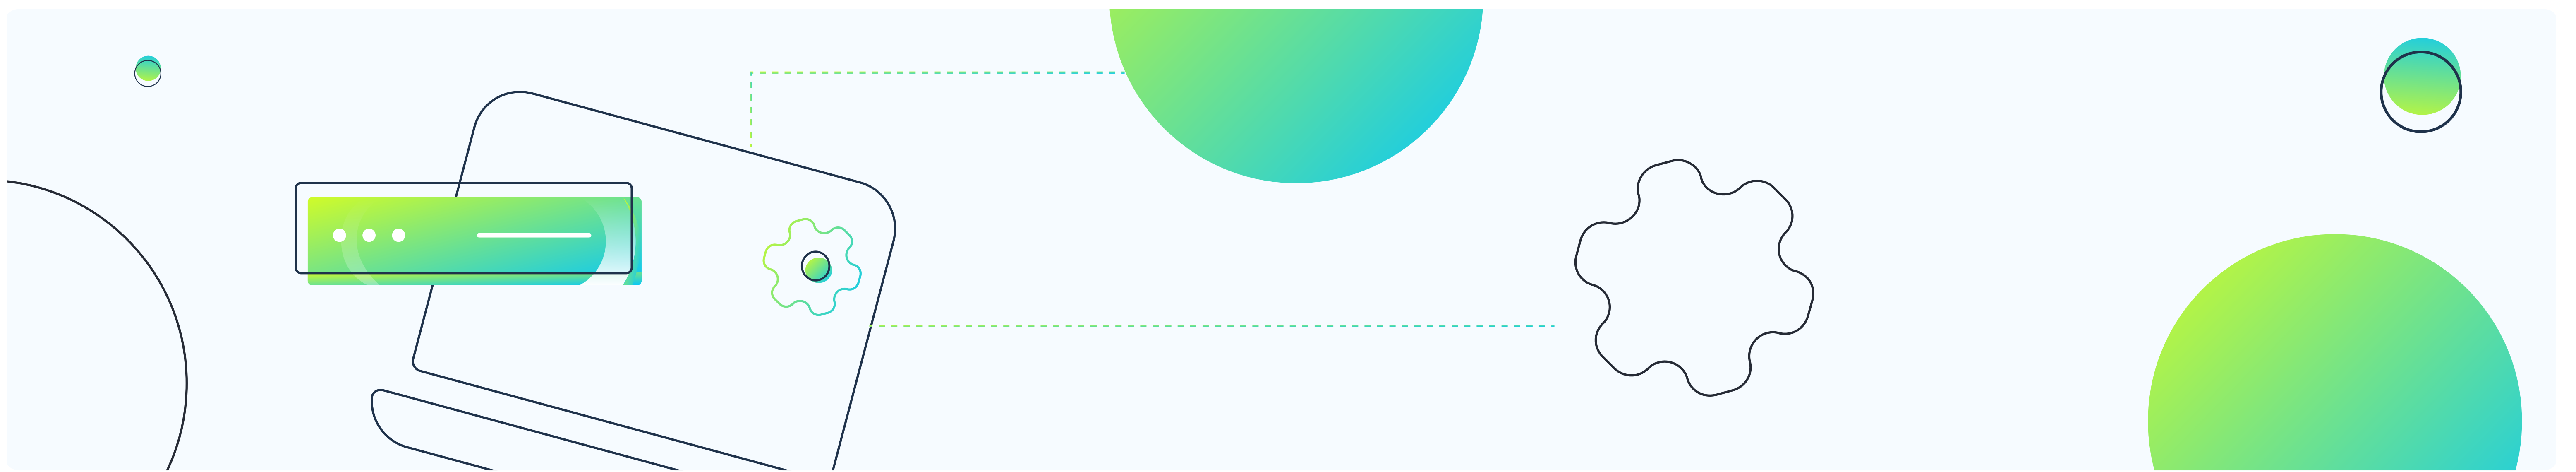

A plugin that improves the original MetaTrader commission scheme by ensuring that all agents in the chain receive their share of profits.

Negative Balance Protection

Prevent negative balances

Plugin automatically detects accounts with below-zero balance and performs a balance operation to return the balance to zero.

MT4/MT5 Dynamic Margin & Leverage

Dynamic Margin & Leverage plugin provides brokers with flexible settings to manage leverage and margin requirements on a per-account and per-symbol basis. Dynamic Margin & Leverage can now be configured through Plugin Configurator, a user-friendly interface for Brokeree plugins for MetaTrader.

Brokers can use a variety of filters like balance, equity, and volume of open trades while assigning margin rates to configure dynamic scenarios and encourage customers to make deposits to reach new leverage levels.

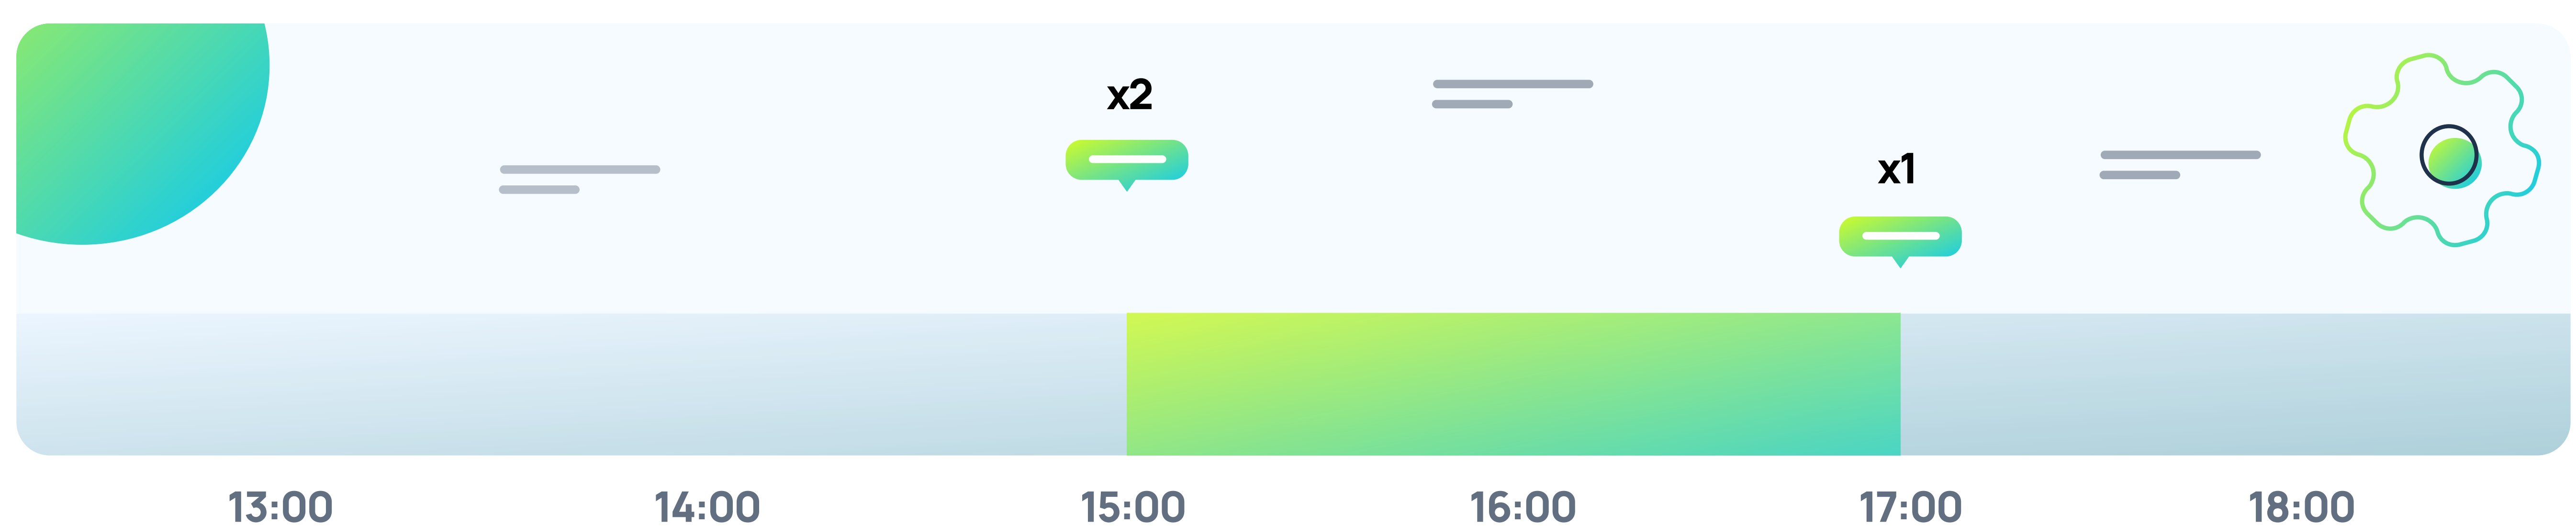

Features

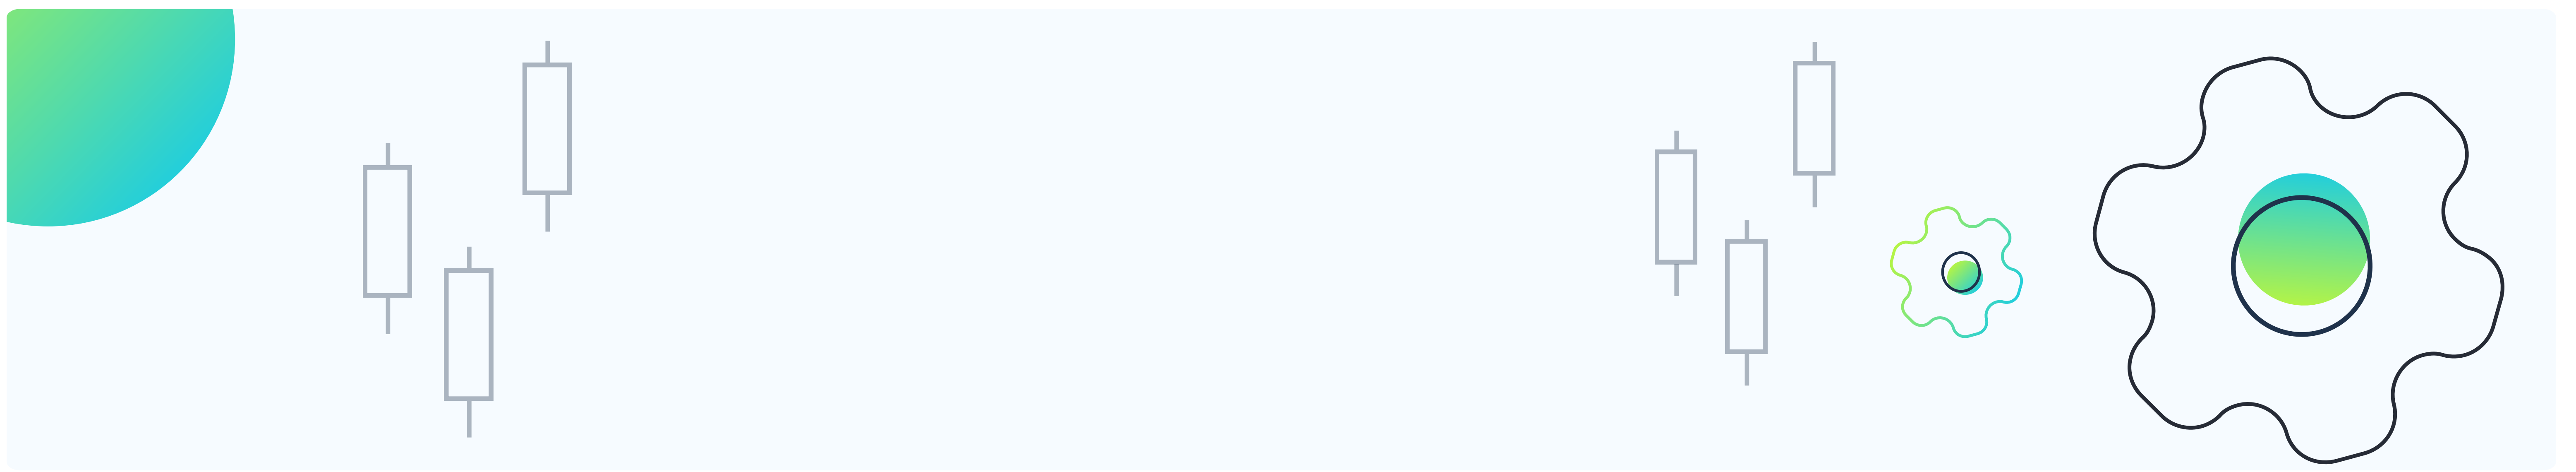

- Automate updates of user's leverage based on balance or equity levels
- Schedule margin requirements changes for a specified period
- Automatically reject trade requests that will cause MC/SO events
- Customize individual stopout level per trading account or group

Scheduled Margin Rules for News Events

With the solutions brokers can minimize clients' risk exposure during high market volatility by increasing margin requirements.

- Set up margin rules for major news events in advanced with scheduled rules

MT4/MT5 Dealing Desk

Brokeree Dealing Desk is a powerful risk management tool that allows forex brokers to optimize dealing processes for ensuring the best order execution for clients.

Features

- Set up for specific trading scenarios with an extensive list of filters
- Detect high-frequency trading with a "Trade Duration" filter
- Separately process order requests for frozen quotes
- Option to use advanced slippage management settings to avoid delays caused by routing rules or gateway execution to ensure best execution prices.

Tools for Risk & System Optimization

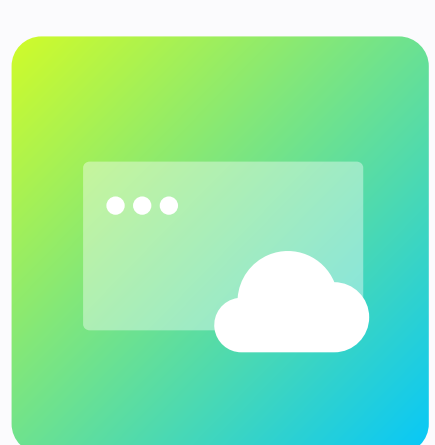

Trade Copier

Copy positions from one or several clients to a coverage account, based on configurable rules.

Advanced Stopouts

Free up used margin so traders can decide to either close losing positions or deposit additional funds.

Web API

Integrate MT4 and MT5 functions into your brokerage web application with a well-documented REST API.

Margin-Credit Tracker

Automatically withdraw credit funds from an account on a margin call or a stopout to prevent a client from going to a negative balance.

Swap Manager

Specify a swap-free period for several days for newly registered accounts or any new trades on specified symbols and process swap fees as a balance operation.

Symbol Editor

Automate swaps' updates or update a swap list from an external data source, like an LP.

Conversion Rate Markup

Add markup to the default currency conversion rate. The markups can be specified in points or as a percentage of a current exchange rate and work for specific user groups using accounts and symbol filters.

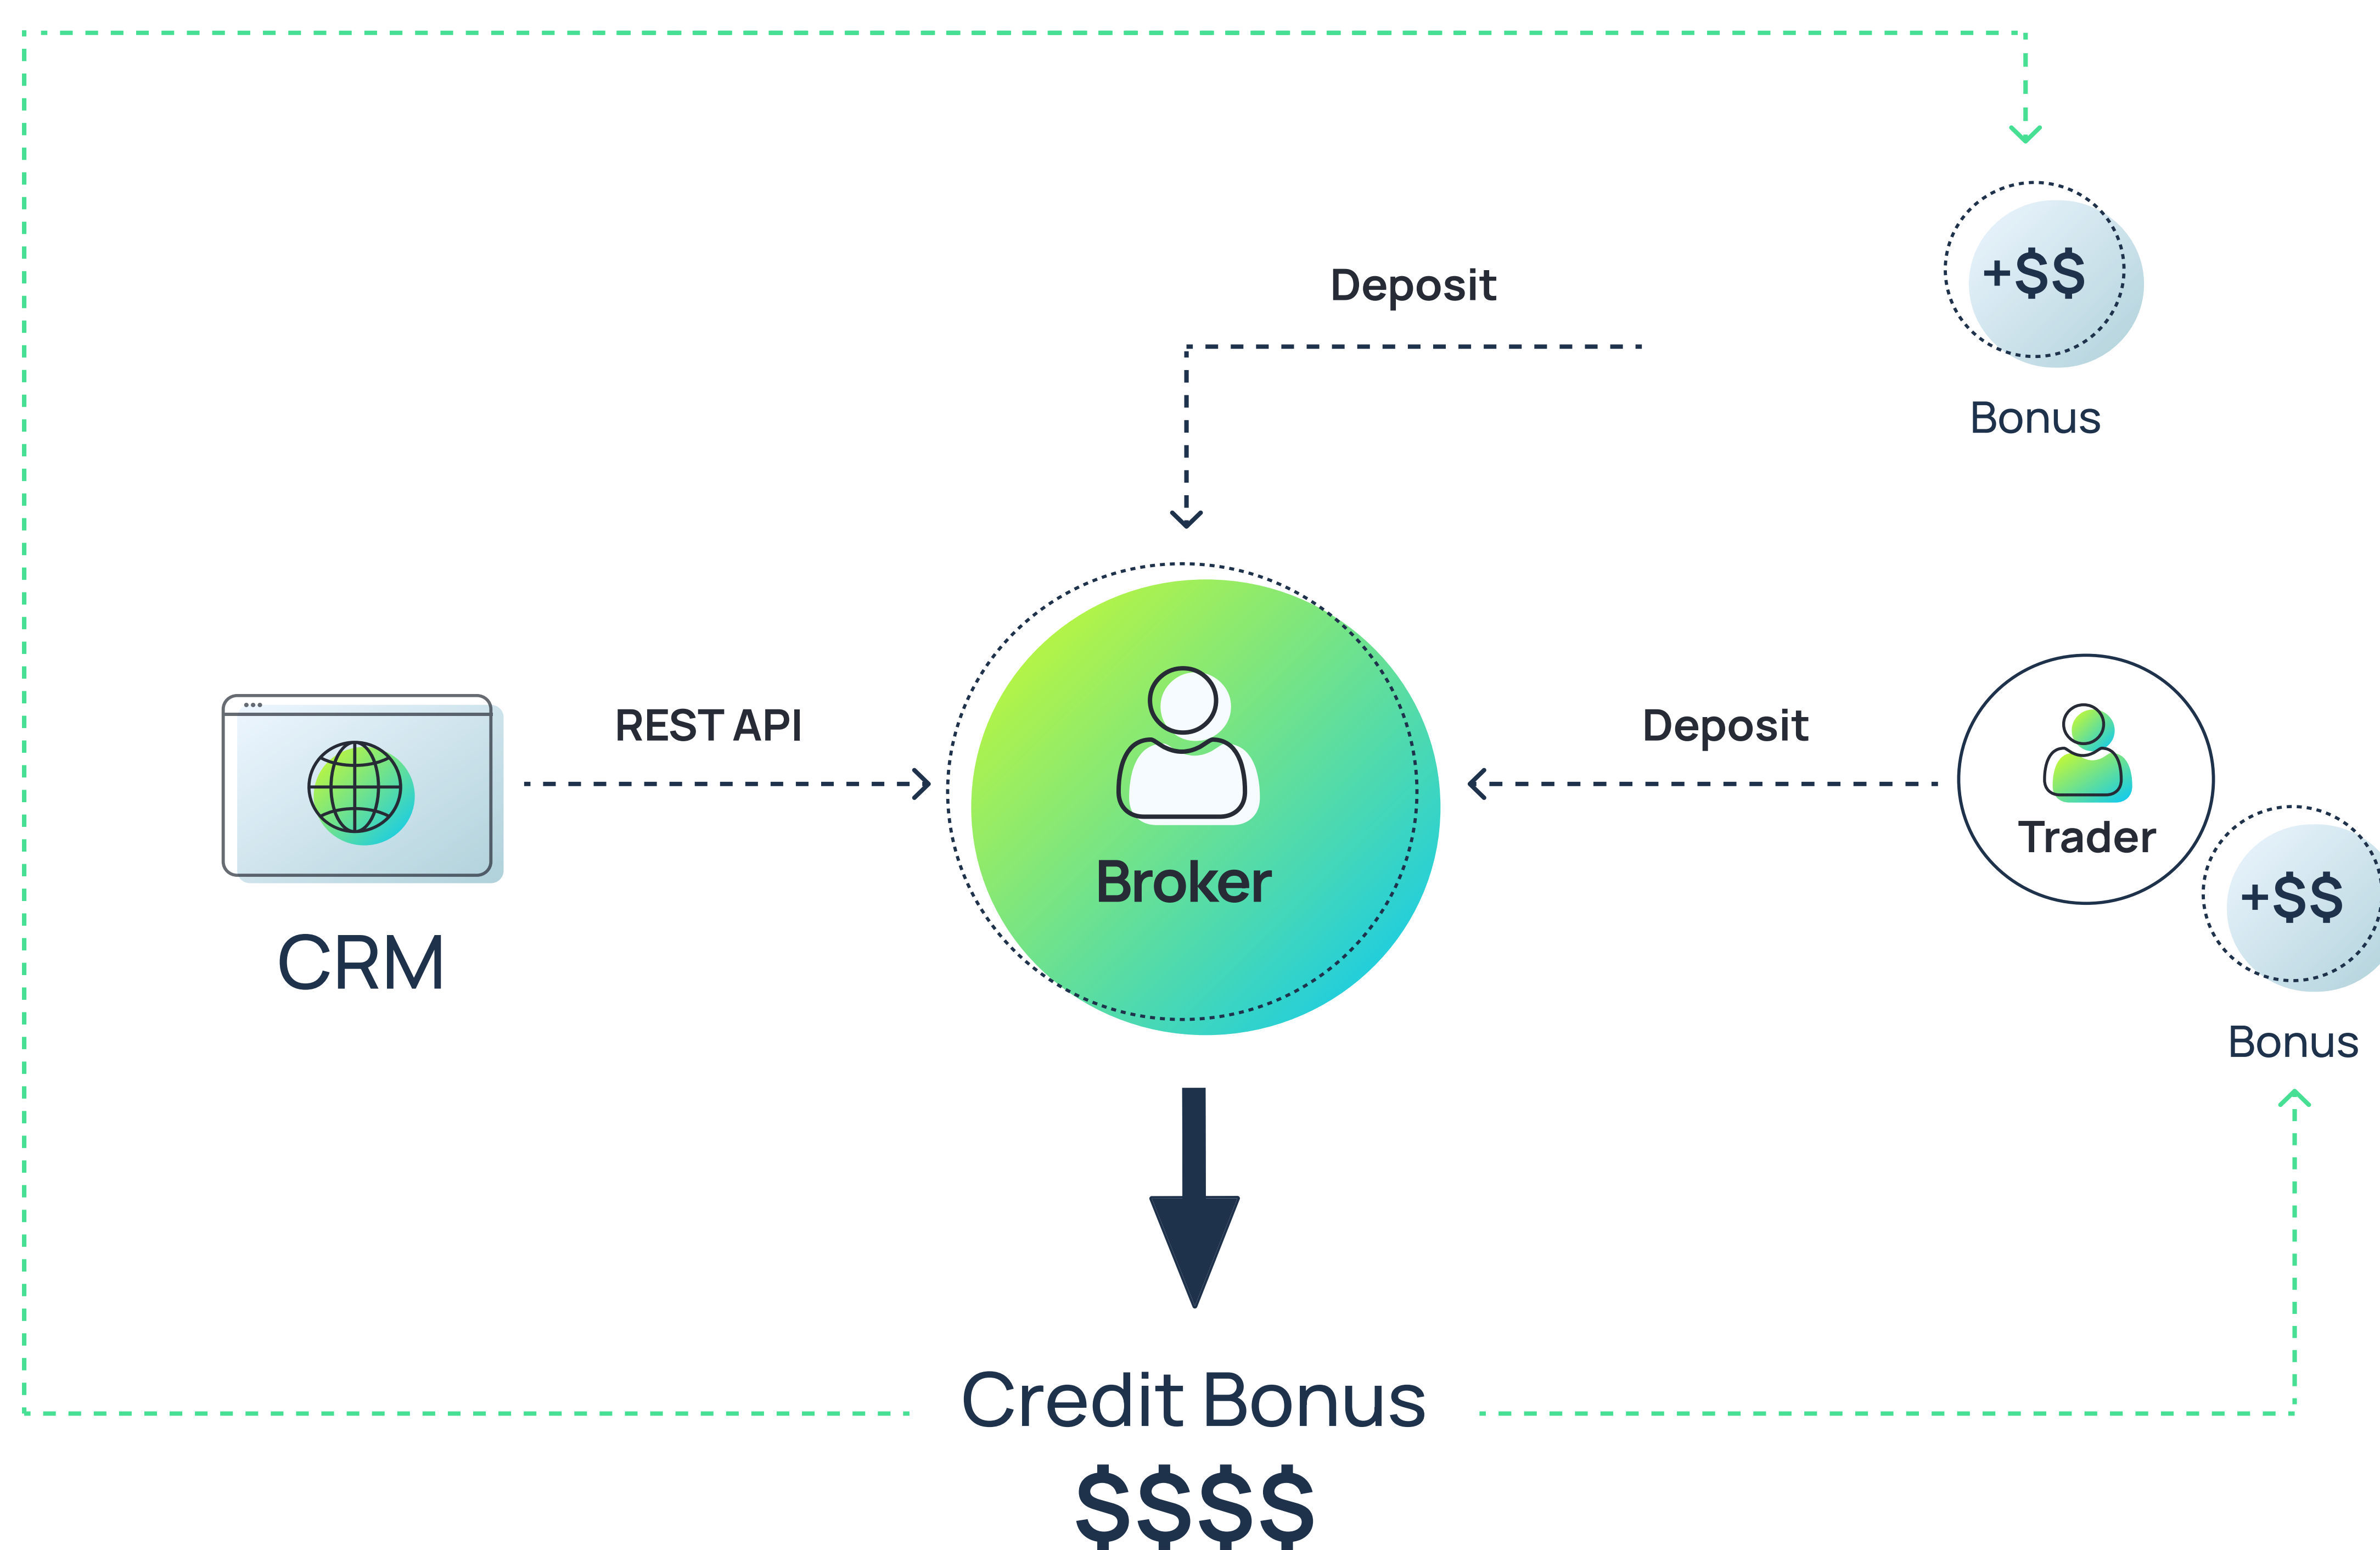

Marketing Suite

Bonus distribution and promotional campaigns

MT4

MT5

A comprehensive solution for multi-asset brokers to align marketing campaigns with automatic bonus distribution.

Types of promotions:

- Deposit
- Rebate
- Cashback
- Transfer

Features

- Design unique campaigns with different bonus types
- Reward agents and IBs via affiliate bonuses
- Set maximum bonus limits for multiple campaigns
- Withdraw credits once a stop out occurs to minimize losses
- Configure promotions remotely via web interface

Client retention

Increase trading volume

Reactive dormant accounts
