

# Multi-server Liquidity Bridge

for MetaTrader 4 and 5

At Brokeree Solutions, we strive for excellence in turnkey solution development and MetaTrader platform servicing. With us, retail brokers gain the technological means necessary to attract new clients, surpass competitors, and manage their business more efficiently.

# Hello!

We are Brokeree Solutions – developers of technological solutions for multi-asset brokerages from all over the world.

Our global mission is to help our clients to extend their trading platforms in different areas such as liquidity aggregation, risk management, and money management. For more than 8 years we have been providing brokers from different jurisdictions, including CySEC, FCA, ASIC, BaFin, MAS, AMF, DFSA with turn-key solutions to optimize and automate their MetaTrader platforms.

We strive to build long-lasting partnerships that allow us to provide our clients with cutting-edge technology that meets constantly evolving requests from both the trading community and regulators.

If the products and services found in this brochure pick your interest, don't hesitate to contact us for more information. We'd be happy to tell you about our offers and arrange a demo for any of our solutions.

Kind regards,  
The Brokeree Team

# MT4/MT5 Liquidity Bridge

Multi-server Liquidity Bridge is a comprehensive solution that combines advanced A/B book order execution, smart liquidity aggregation, and risk management.

The solution has a flexible routing system that allows brokers to either hedge client trades at a liquidity provider or process trades in-house at the current price of the LP based on predetermined attributes.

## Key Advantages

- Web-based administration portal
- Smart quotes aggregation
- Hybrid A/B books trade execution
- Monthly flat rate subscription with no volume fees
- Over 25 liquidity providers integration
- DoM for monitoring incoming liquidity
- Available for MetaTrader, DXtrade and cTrader
- Multi-server support
- Advanced routing rules
- Immediate service launch

# MT5 Gateway

Brokeree's MT5 Gateway enables brokers to receive quotes and send trade requests directly to a chosen liquidity provider.

## Features

- Stream quotes from liquidity providers to the trading platform
- Automate option symbols settings synchronization
- Execute market orders directly at a counterparty
- Seamlessly integrate solution with MetaTrader 5

## Supported Liquidity Providers

# MT4/MT5 Feed Server

Brokeree Feeds is a technology that connects brokers to any data provider and allows them to quickly access market information. Brokers will be able to stream quotes for forex, equity, cryptocurrency, metals, indices, and CFD symbols directly to their MT4/MT5 platforms in real-time, ensuring the best trading conditions for clients.

## Features

- Connect to market data providers via FIX
- Process market data from several sources within one connection
- Prevent off-market prices by filtering spikes
- Customize bid/ask markups before MetaTrader

# Brokeree Solutions

We are industry experts in MetaTrader 4 and 5 solution development and platform servicing. Our comprehensive products allow brokers to optimize their business and create a unique service offer by fine-tuning their trading platform.
