

Cross-server PAMM

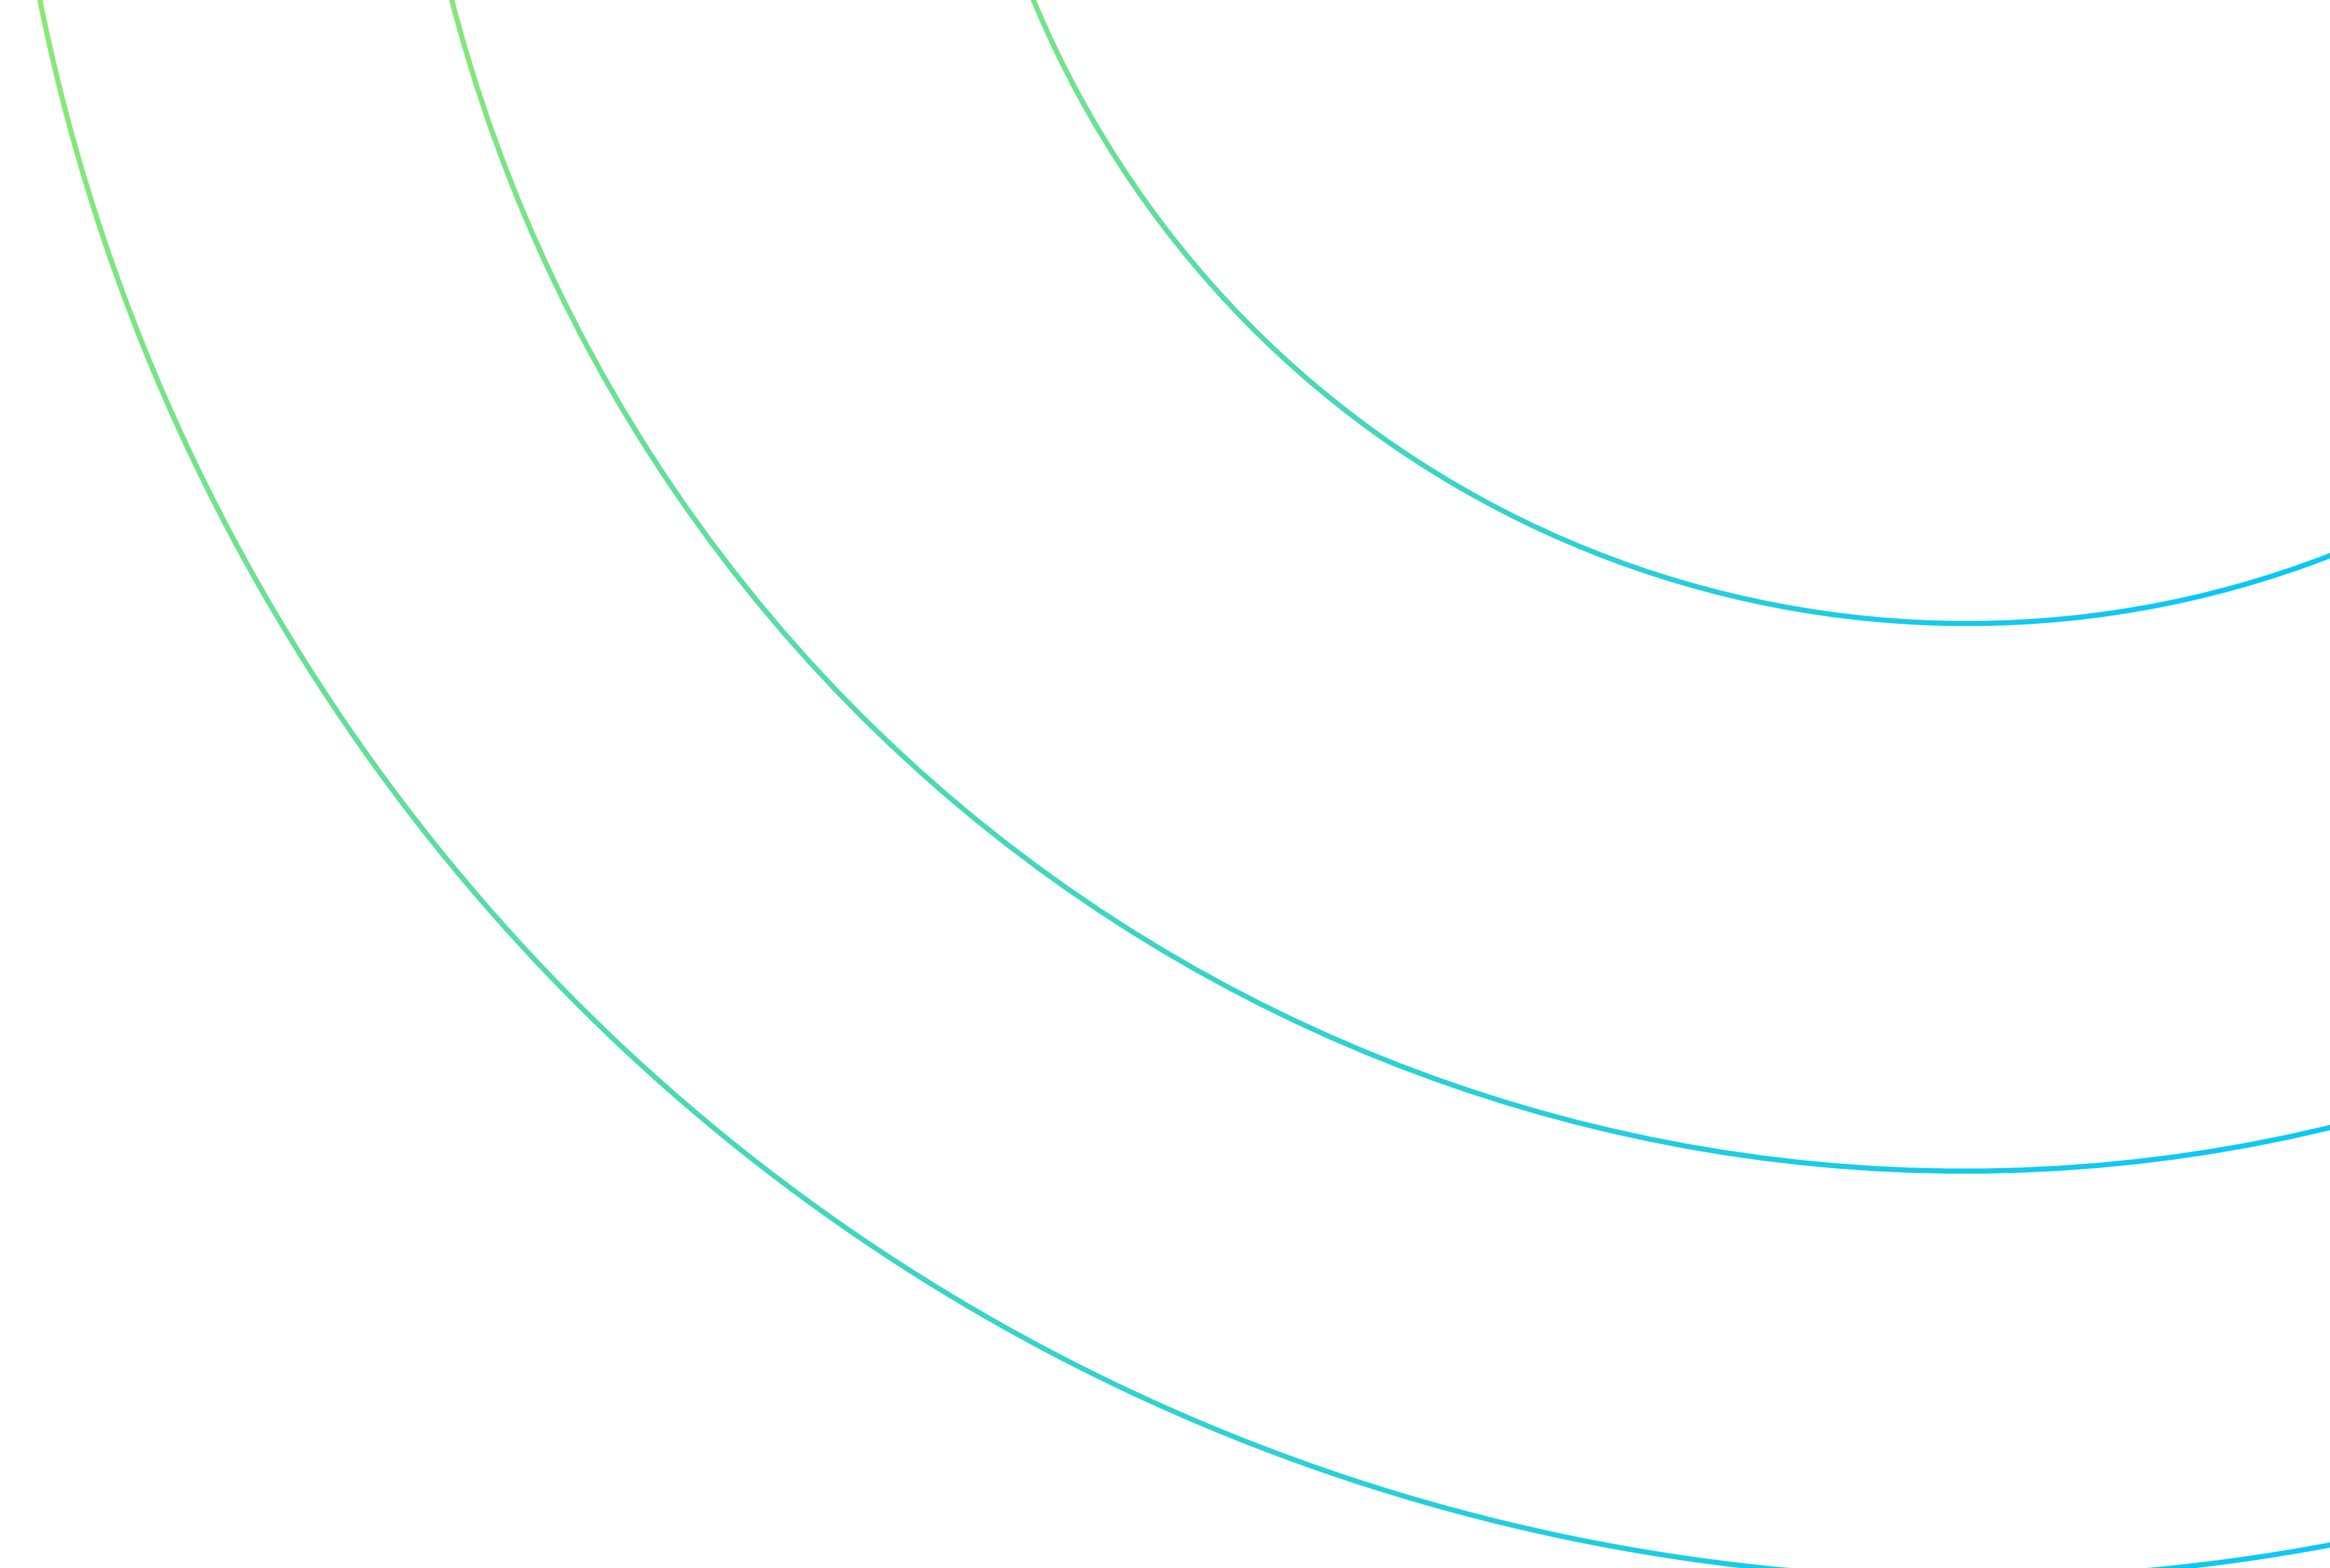

for MetaTrader 4 and 5

At Brokeree Solutions, we strive for excellence in turnkey solution development and MetaTrader platform servicing. With us, retail brokers gain the technological means necessary to attract new clients, surpass competitors, and manage their business more efficiently.

Hello!

We are Brokeree Solutions – developers of technological solutions for multi-asset brokerages from all over the world.

Our global mission is to help our clients to extend their trading platforms in different areas such as liquidity aggregation, risk management, and money management. For more than 8 years we have been providing brokers from different jurisdictions, including CySEC, FCA, ASIC, BaFin, MAS, AMF, DFSA with turn-key solutions to optimize and automate their MetaTrader platforms.

We strive to build long-lasting partnerships that allow us to provide our clients with cutting-edge technology that meets constantly evolving requests from both the trading community and regulators.

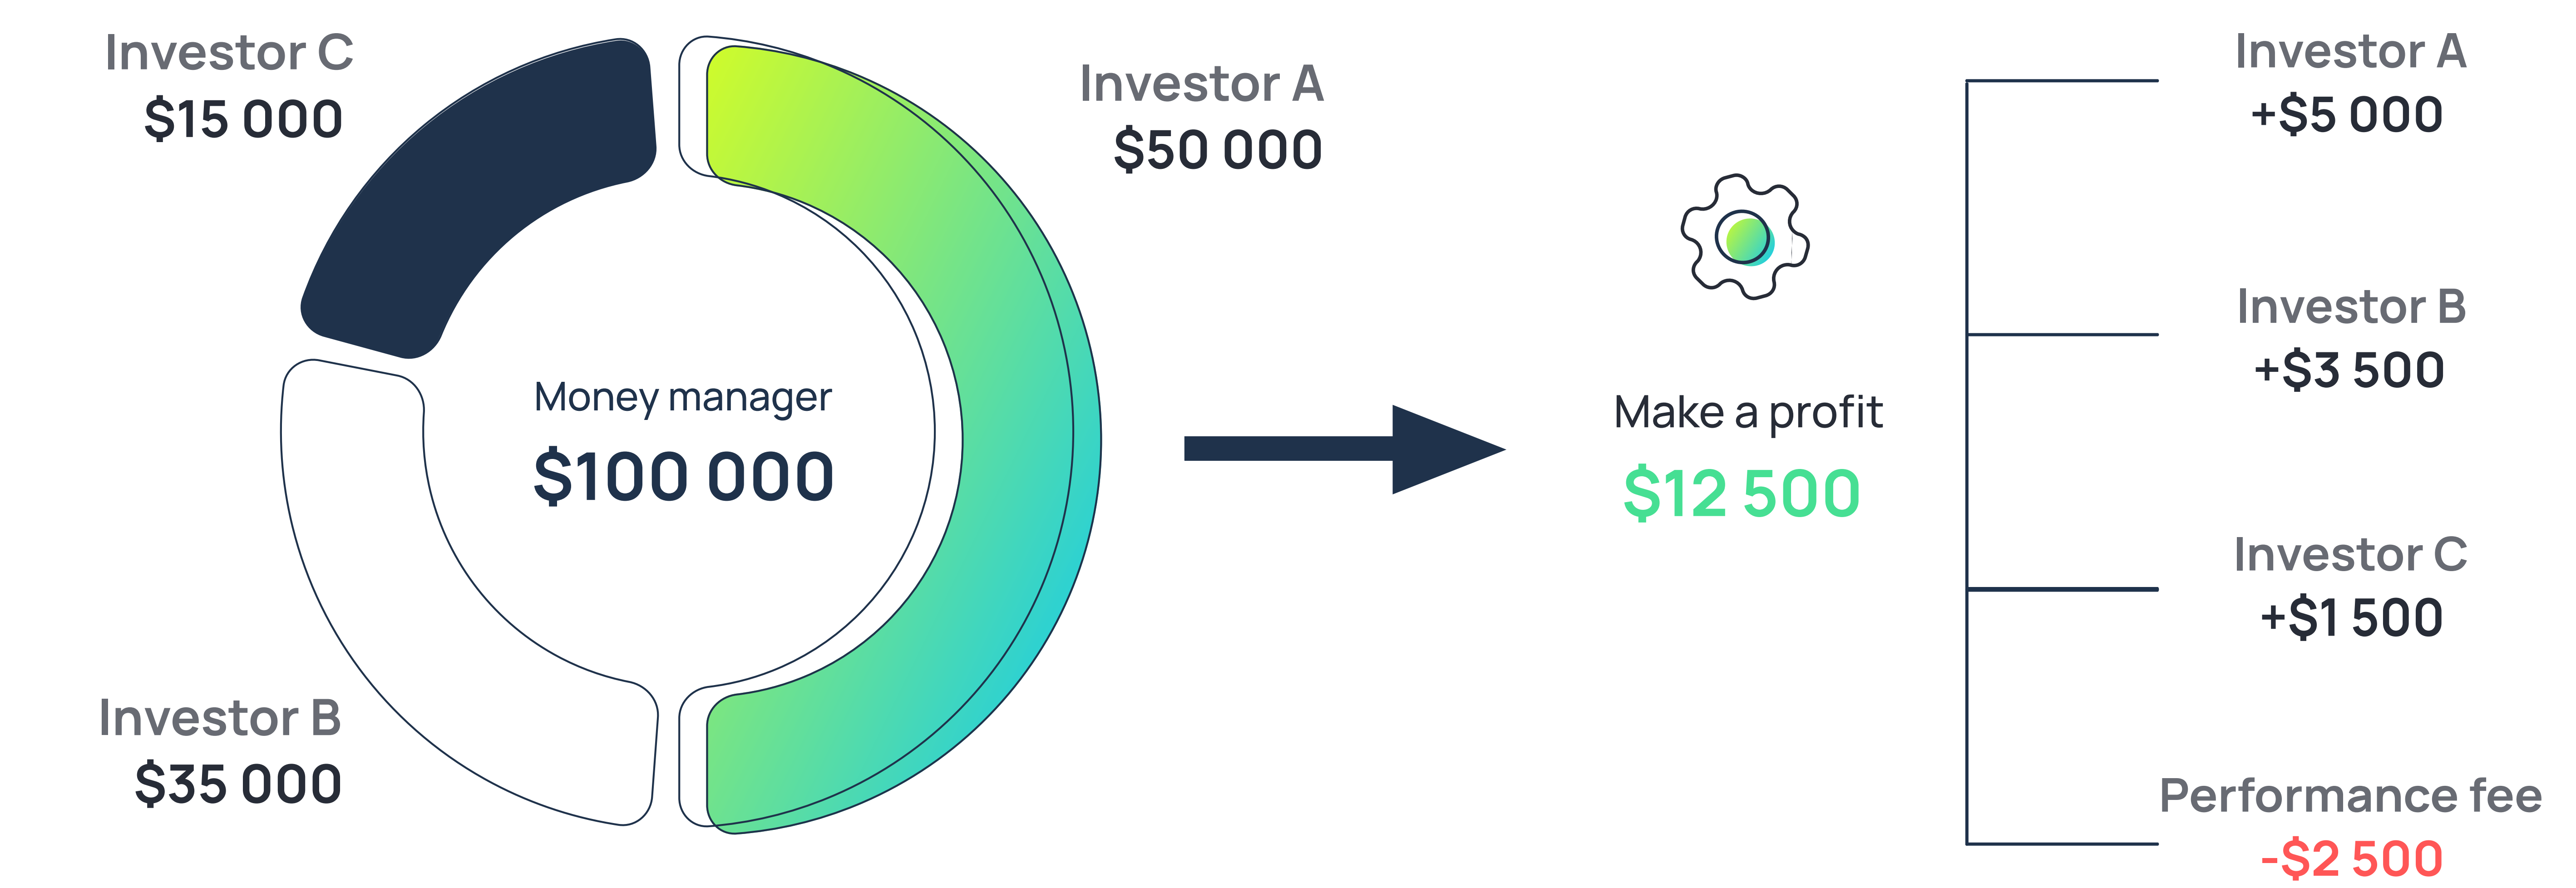

If the products and services found in this brochure pick your interest, don't hesitate to contact us for more information. We'd be happy to tell you about our offers and arrange a demo for any of our solutions.

Kind regards,
The Brokeree Team

Multi-server PAMM

PAMM — Percent Allocation Management Module — is a comprehensive solution designed to attract quality money managers and investors with advanced trading capabilities.

PAMM by Brokeree grants investors the flexibility to deposit and withdraw funds at any time and appeals to top-notch money managers with its configurable performance fees and zero trading limitations. The solution does not cause server overload and execution latency even when trading volume increases while working with aggregated accounts.

Key Advantages

- Web portals for investors and money managers
- Flexible performance fees and commission calculations
- No trading limitations for money managers
- Available for MetaTrader 4 and 5
- Multi-server support
- Whitelabel friendly
- User portal is available in 15 languages
- Guaranteed fixed price with no volume fees
- Immediate service launch
- Easily integrable with CRM via REST API

MT4/MT5 Ratings Module

Ratings Module allows brokers to set up interactive, colourful and elaborate leaderboards displaying their top performing traders and providing their clients with effective means to analyze and follow a provider of their choice.

Key Advantages

- Seamless integration with Social Trading and PAMM
 - Detailed trading and performance statistics
 - 3 different widget types: tables, expanded rows, cards
 - Automatically assign traders to different widgets
- Custom badges to reward traders
 - Stylize widgets via admin portal
 - Embeddable widgets for a website
 - White-label friendly

Organize trading competition by automatically populating the widget with participants and measuring traders' performance by a custom rating point.

MetaTrader ID	Rating ↓	Return (1W)	Return (1M)	Max drawdown	
13520	137.985	24.04%	13.25%	4.77%	Profile
15156	50.06	18.16%	12.14%	8.41%	Profile
15244	43.67	16.37%	9.89%	6.14%	Profile

Ratings Module Integration

With unprecedented customization capabilities brokers may choose between 3 different layouts to create custom widgets for different user groups: top signal providers, PAMM accounts, trading contest participants, etc.

Elaborate trading statistics, interactive graphs and tables will assist your clients in choosing the right investment strategy.
